**GOLD MINER INDEX BREADTH TRACKING**  
**March 12, 2014**  
**Directional Analysis for your profit.**

Time for an even break for PM COMPLEX Investors,  
 Brought to you by Denaliguide's **PEAK PICKS**

**Below (LEFT) the WEEKLY, about 5X more powerful, than the DAILY BELOW (RIGHT)**

**WEEKLY:** MACD and Momentum(shorter term element inside TREND) approach tops, loose speed and begin to turn down. WEEKLY Oscillator Tracker is in topside Downward Reversal Zone.

**DAILY:** MACD and Momentum(shorter term element Inside TREND) turns down. DAILY Oscillator Tracker is in a Neutral Zone, drifting lower.

**GOLD Itself** now begins to hesitate as the MACD begins to lose its upward energy. Momentum(top panel) is stalling, turning down.

This looks like a Classic two or three shooter **MEXICAN STANDOFF.**

**FACTUALLY** Gold, the Metal, bottomed in June & December, then ramped 20% both times. I expect further gains after correction. The next Ramp in the Gold Price will take it to a Equilibrium Point, IMO.

**WEEKLY GOLD MINERS INDEX**

**DAILY GOLD MINERS INDEX**

Here the same MEXICAN STANDOFF is visible as the WEEKLY is trying to Correct, while the Daily is Drifting down. The strong accumulation in the WEEKLY GDX and its upward momentum since JUNE saying that the correction as it happens, may only go as far as the 30 Week MOVING AVERAGE on the WEEKLY, and 200 Day Moving Average on the DAILY. To get to a RALLY spot, correction will need to happen.

**THE SHORT ANSWER:** Once the **PM COMPLEX** finishes its correction you may want to be strong and long specific stocks we identify as **STEALTH BREAK-OUTS**. With the correction waiting in the wings, it will be important to know where we are and where we might be going. The Oscillator and its Analysis can help us develop our understanding of what might be coming next. Add Common-Sense Physics (**TA**), Clear Observations(**TA**), to Tactical Savvy, and we may be able to get a clearer view of this next market sequence. market sequence, in Peak Picks.
