GOLDEN DOUBLE CROSS
 &
GOLD MINER BREADTH OSCILLATOR

First lets look at the Daily and Weekly GIMBO's, (analysis P.2)

WEEKLY GIMBO

DAILY GIMBO

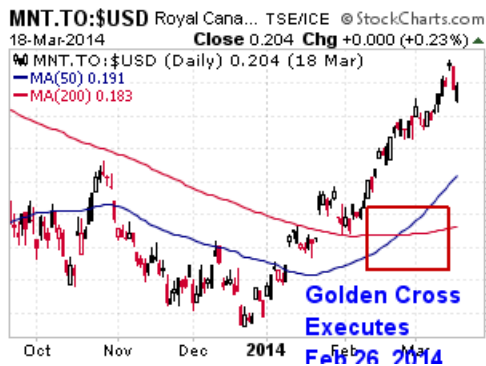

Weekly GIMBO stalling in the **HI Reversal ZONE** Daily GIMBO working its way downward to find support. Details on P.2

And Now see us **GOLDENLY DOUBLE CROSSED**
 & **"ROYALLY SCREWED" ?**

Just like one of the hopeless **heroines** ("Reign", Episode 13) in a TV series I think we the PM Investing Public have been nakedly screwed in front of the entire world, looking on and snickering as we lie there supine and helpless as the KING OF FRAUDS, CRIMEX has his way with us. The KING of FRAUDS has been painting a picture for everyone to see, whilst debauching every PM Investor with every price it paints.

Have we been so abused we no longer have the capacity for OUTRAGE ?

RAPE, in any shape, fashion or form is **ABUSE**, and I can tell you, first hand, having been in the "recovery" business, NO ONE EVER DESERVES ABUSE. Death, maybe. ABUSE, **NOT**. I am not going to point fingers here, as many of us have our personal choice for the villains responsible for this in mind. Simply take a look at the graphic evidence I present and then evaluate some of the questions it poses. Please note the RCM Inventory Receipts(MNT.To) price has been adjusted by US currency pricing for comparison.

The **SHORT ANSWER** IS the **CRIMEX** is **PAINTING** a Picture for you. IMO it is **INSIDIOUS** and a **FRAUD**.

as the price on the **RIGHT HAND SIDE** is the price for PAPER Contracts, but accepted as the Gold Metal price on the **LEFT HAND** chart, which may point to why there is a Golden Cross as of Feb 26, 2014 on the Royal Canadian Mint Gold Inventory Reserve(REAL METAL).

I dont know where your outrage is but I know mine is cold and determined, to level the playing field for investors.

WEEKLY

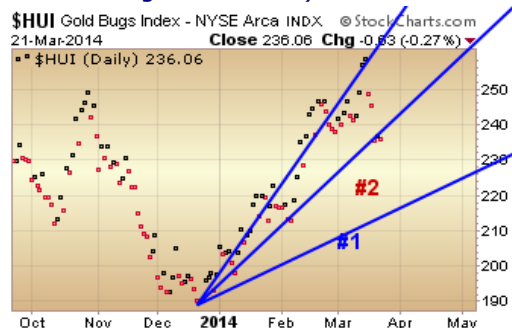

DAILY

Right now I see the Weekly & Daily Top Panel of STOCHASTICS a bit scary as they both are declining in the same position and speed. On the Reality front, it seems both the GDX and HUI, will stop on support based on the gaps on the next page. As well on this page I have roughed in the Speed Resistance Lines on the charts below to give you an idea of where to look as time progresses, rather than an absolute support level not related to TIME (in case PUTIN gets another bright idea or OBAMA grows a brain).

So I'd not be surprised if we find ourselves diving to Line #1 on either charts. In Either CASE, the TREND continues.
