

# GOLD MINER OSCILLATOR

## Boxed-In or Break-Out ? 3/31/14

Lets cut to the chase. We are on a bounce but its not the final move, IMO. I think each pix is worth 1K words. This is the state of the PM Market, bouncing & basing. Going for support from which the next rally will emerge.

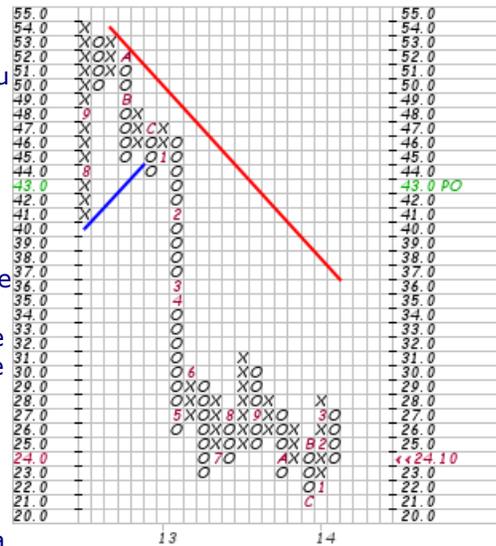

Short term down on Base, Intermediate Term down from top, Long term UP.

If we go back 10 yrs to 2003 we now see that the Ultra Long Term Secular Trend (Monthly) we see it carries the other two UP. 'Nuf said.

From the GDX P & F chart you see how "based-out" this move from December is

**GDX NYSE**  
 28-Mar, 16:00 ET, daily, C: 24.10, Chg: +0.28  
 No New P&F Pattern  
 Traditional, 3 box reversal chart  
 Bullish Price Obj. (Rev.): 43.0

We also what a fabulous DROP ZONE we are in. Likely, IMO, that we bounce around some more, maybe one more low. The trick here is to TRADE the trade-able moves and not over-stay them. Soon enuf,

bigger moves will come your way. Now, what stocks are we gonna ride this bull with?? Maybe we should look at the stocks that stood up best against this last decline from Mid-March:

## GoldMiner Index Analysis & Stocks MAR 28, 2014

This is what those stocks look like:

I counted about 30+ stocks in this weeks PPP that were above their 50 DMA's, had good accumulation, and about 1/3 of them on 60 Min charts stealth breakouts, as well as that many already in daily breakouts.  
A bunch more where they came from as well in 60 min Stealth configs.

28-Mar,  
**P&F Pattern** Double Top Breakout on Mar-2014  
Traditional, 3 box reversal chart  
Prelim. Bullish Price Obj. (Rev.): 3.13

Given the GIMBO Oscillator, Intermediate and Long Term appearing previous, plus the Ultra Long Term ( Monthly) of the XAU, it is easy to visualize the Gold Miner Indexes pretty much boxed into a Mexican Standoff during the Month of April, until they can build that support and base from which a new rally will emerge as late as 2<sup>nd</sup> week in May.

The flip side of that for the

Savvy and Aware investors is to set some Snares in the form of Limit Orders for stocks they want to acquire before the next rally bursts forth.
