

GOLD MINER OSCILLATOR

Get Ready for a MOVE !

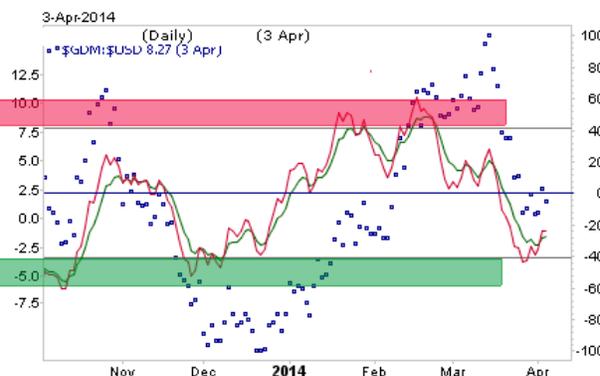

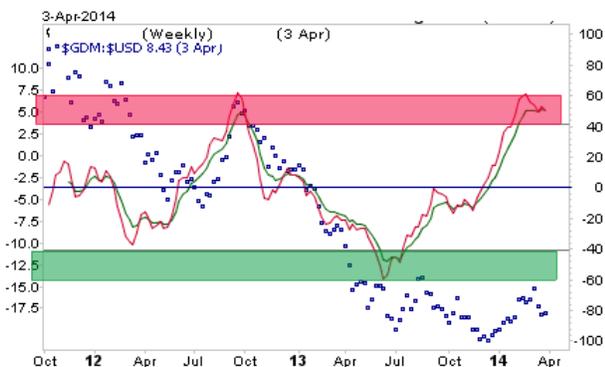

APR 7, 2014

Cut to the chase. The yellow box is important because, it outlines what are typical limits of Support & Resistance, until the Anniversary of the TAX-DAY Massacre. Thus

given the odds, I think the BASE is established, & support as well, that sets up a launch pad for a rally to be staged anytime in April. My thinking is that the odds favor a final low about the Christian Good Friday, and that would match the 1st Anniversary of the TAX DAY MASSACRE. And all this is of course, IMO.

The **TILT** chart gives you an idea where we can go, plus the typical cycles we find running in the PM's.

Both Monthly and Daily Gold Miner Oscillators (GIMBO) are setting up for a convergence in April as well.

<<< so here we see the Super Long Term (mo'ly) trending up which is showing that if the Longer Term (weekly) is trending down its in the CHANNEL UP

Now to that we add back in the Daily Sentiment of the BULLISH% of GDM stocks and we sit it setting up for an upturn. Again, odds say its turns in 4 wks or less.

NOW ?? SIT TIGHT or establish pre-Position SCALE-IN Limit orders. NIBBLE @ the RECOS.

GOLD MINER OSCILLATOR Analytics

Last weeks Cycle & P/F charts remain here as they are as illustrative now as previous.

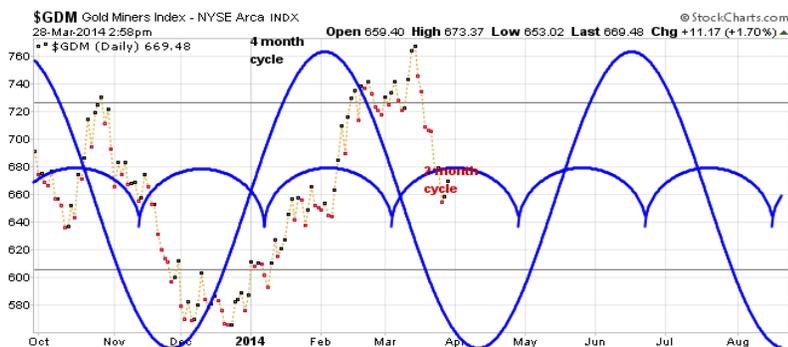

\$HUI INDX

28-Mar, 16:00 ET, daily, C: 224.811, Chg: +3.526

P&F Pattern High Pole Warning on 19-Mar-2014

Traditional, 3 box reversal chart

Bullish Price Obj. (Rev.): 290.0

In that regard I offer this list of stocks that HAS NOT VIOLATED their 50 Day Moving Average (support) to the downside as strong exceptions to this fun correction we have experienced from Mid March to the first week in APRIL>

ABC, DEF, GH, IK, LM, NO, PQ, RS, TU, VWX, YZ, an alphabet of phony stocks

The real list is on the April 4 issue of Peak PICKS

ZY, TV, XW, UR, SQ, PN, LM, KI, HG, FEA,BCD(all fictitious)(real ones on PEAK PICKS)
(END)

No doubt one or other of these stocks listed in PEAK PICKS is either a favorite or right for you, so to get ready for this move, you may wish to take advantage of this next dip before the move materializes.

Failing to plan this, would simply be Defeat by DEFAULT, and heavens knows we have had too much help planning the PMs Investor's demise to miss this opportunity to plan for the next move. That's what PEAK PICKS is geared to do for you

Find Juniors, Micro-Caps, Break Outs, and some stocks of which you have never heard. All human 100% 24/7, no algos, we are here to help you PROFIT NOW !

If you want this level of savvy and insight, straight talk, and plain dealing, you may want to subscribe to PEAK PICKS.

SUBSCRIBE HERE & NOW ! NO RISK U\$D 33.97 mo'ly, no contract, satisfaction guarantee immediate refund upon request, no questions asked ! **This week we will have our special report on the next rallies potential stars, like the ones above.**

DENALIGUIDE'S STRAIGHT TALK

OUR DGS MISSION STATEMENT:

To provide our subscribers with the clearest, easiest to use, most timely selections for profit.

OUR DGS STATEMENT OF PRINCIPLES

We strive to treat everyone as we would wish to be treated.

We embrace simplicity.

We understand that our freedom lies between the moment of stimulus and response.

WE PROMISE TO:

KEEP OUR SUBSCRIBERS WELFARE PARAMOUNT.

MAINTAIN OUR OBJECTIVITY AND INDEPENDENCE.

ONLY ACCEPT ANY FORM OF COMPENSATION FROM OUR SUBSCRIBERS.

THREE KEY QUALITIES WE FEEL ARE ESSENTIAL TO OUR WORK:

SIMPLICITY

DISCIPLINE

FLEXIBILITY

HOW WE OPERATE:

1. WE observe and maintain STOPS 100% of the time, mental, straight or sliding.
This is absolutely mandatory to preserve capital, hedge, and eliminate mistakes..
2. We KEEP IT STRAIGHT & SIMPLE **K.I.S.S.** Acquiring / Disposing.
The stocks you acquire and dispose of, are inanimate and fluctuate I price.
The have no other qualities. So we don` t become romantically involved with them.
3. We speculate based on Technical Merit, not public information.

Mechanically WE do the following:

- A. Set BUY LIMIT ORDERS and do NOT chase stocks.
- B. We sell using Technical Measures that indicate danger to longs.
- C. We buy & sell in Pre-Position, before Mass Action Awakens.

"Simplicity is the ultimate sophistication" Leonardo da Vinci

PEAK PICKS Strategies & Tactics Corner

You can do your best to buy on down days, but with the way this is moving, too much caution may net you nothing, so be

tempered about GREED. **STOPS** should be set at the **CROSS** over of the **20DMA** and **50DMA** until you have sufficient profit to move them up by the same proportion that existed **BEFORE** from that crossover.

For instance, the last ETF listed, **SILJ** has a cross over **20/50** at just under **\$10**. Thus the **STOP** is **\$2** under the price. To move the stop upward, you would need about a **15% upmove** to make it sensible, so a move say to **\$13.75**, would allow you to move your **STOP** to **12.00** to make sure you capture a profit whatever may happen.

A slightly different approach uses an existing measure to help estimate your **STOPS**:

A slightly different approach uses

The **LIME GREEN** line represents a price level **3 AVERAGE TRUE RANGES** below the **HIGHEST** price in the last 22 days. You can see how the **AVERAGE TRUE RANGE** is calculated **HERE**. The ATR attempts to take volatility into account but in the case of **SILJ** places the stop so high it is unacceptable, as you will likely get shaken out on **ANY** reaction. The name of this game is "HANG IN THERE".

So to account for this, I'd consider using the **LOWER** of the **TWO**, the **CHANDELIER EXIT** or the **20 / 50 DMA crossOver** for the **FIRST STOP**.

After that its your discretion and comfort zones.

Dashboard Instruments

LINK\$ < CLICK to ACTIVATE

Instrument Panel, **BULL / BEAR** Instrument Chart Interpretation:

1. **MACD & Moving Averages** show **DIRECTION**;
- **StochRSI & CCI** of **CMF**, show **EXTENT** of Move
- **Extremes** of **Stoch RSI & CCI** of **CMF** relent when **MACD** reverses .
- Thus **DIRECTION** continues **UNTIL MACD REVERSES**.
- For analysis, remember that **StochRSI & CCI** are **RELATIVE** measures, **MACD & Moving Averages** are **ABSOLUTE** measures, and will persist in extreme states **UNTIL the ABSOLUTE Measures CHANGE DIRECTION**

So **MACD** shows which way the trend is going, and **StochRSI** tell you when the **Trend** has been so strong for so long it may begin to lose steam and reverse, for when **StochRSI**, moves out of its "**Xtreme Zone**" it is a "**HEADS - UP Alert**" that **ALWAYS HAPPENS before a TREND CHANGE**. One last note: **TRENDS** do NOT always CHANGE when **StochRSI** exits an extreme zone (generally 80 or .8 on the upside & 20 or .2 on the downside). **You may always set a stop limit or buy limit @** the 20/50 DMA Bull crossover, and a **STOP** order 10% lower than that point.
