## PEAK PICKS Analysis of "3-2-1" Stocks APR 9, 2014

Editorializing Peak Picks on 321Gold, I got to take a closer look at some of their advertisers in Resources, and this is what I found, on a weekly basis, and it showed me a number of stocks with good possibilities. Not all of them, and not by fundamentals as 321 picks them, but rather on the basis of Technical Merit, as I analyze it. This, in turnabout, I present my PICKS from 321's herd of stocks. Ironically, on 321GOLD, the stocks that attracted my immediate attention are Energy stocks.

BY & Large P & F charts are not to be taken literally but in fact as "Pointers" much like a Pointing Bird Dog. They can indicate something interesting, and in these cases, often the direction which the items in question may take. Further, vary the time frame for P & F charts and you can get a jump on their next move.

PAN ORIENT is just what it says, in ASIA, so if that is off your plate, well OK. If not, you may want to look at acquiring it or multiple positions in it as it moves back to correct down towards the RED 50 DMA, which is normal in these situations. So for a 125 MilC\$ market cap you get a producing Junior with whale & elephant sized exploration prospects. Again, in Asia. If I were in this one, I'd want in about C\$ 2.00, with a **STOP @ 1.75**.

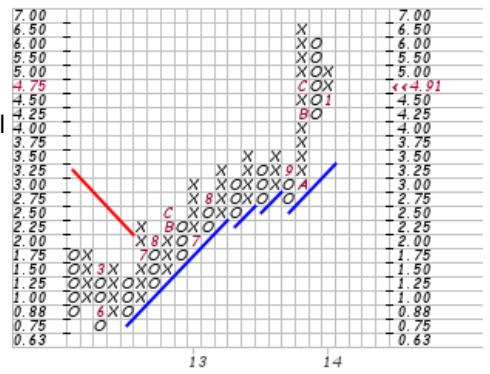

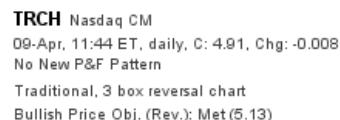

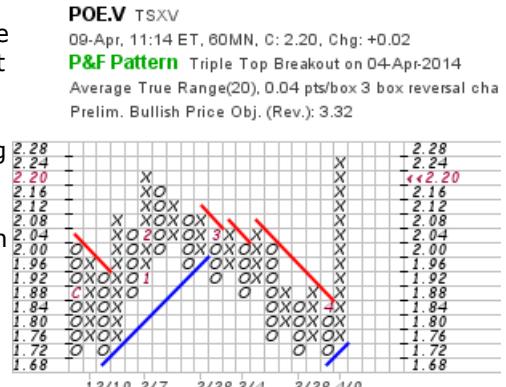

If you would prefer North American prospects TorchLight is a look.

Texas, Oklahoma & Alberta is where they operate On-Shore projects, NG, conventional Oil and Oil Sands. Here the P & F shows them right smack in the middle of a Symmetrical Triangle, and those are prone to break out in the direction of the previous move, which if calculated upon the envisioned

formation, could set up a move to \$8.00. Here I'd pay no more than \$5.00 for any number of positions, and have a

**STOP @ \$4.35.**

## GOLD MINER OSCILLATOR Analytics

Last weeks Cycle & P/F charts remain here as they are as illustrative now as previous.

In that regard I offer this list of stocks that HAS NOT VIOLATED their 50 Day Moving Average (support) to the downside as strong exceptions to this fun correction we have experienced from Mid March to the first week in APRIL>

**ABC, DEF, GH, IK, LM, NO, PQ, RS, TU, VWX, YZ, an alphabet of phony stocks**

The real list is on the April 4 issue of Peak PICKS

**ZY, TV, XW, UR, SQ, PN, LM, KI, HG, FEA, BCD**( all fictitious )(real ones on PEAK PICKS)  
**(END)**

No doubt one or other of these stocks listed in PEAK PICKS is either a favorite or right for you, so to get ready for this move, you may wish to take advantage of this next dip before the move materializes.

Failing to plan this, would simply be Defeat by DEFAULT, and heavens knows we have had too much help planning the PMs Investor's demise to miss this opportunity to plan for the next move. Thats what PEAK PICKS is geared to do for you
