

GOLD MINER OSCILLATOR APR 13, 2014

BREAKING-OUT from Being BOXED-IN

No need for fancy footwork here, the Boxed-In chart shown below has been a far better model than I could have hoped,

Clearly the GDX seems to be minding that BLUE SRL rising from Dec 23, and hitting a BREAK POINT on MAY 10, which, since it has cleared APR 7 without breaking down, says a rally can go forth from here, easily enuf, from this week forward. Maybe not fireworks, but a rally that is not crushed. I noted in amazement how the price perfectly hit the Yellow Target circles, which I had guesstimated in their places.

GOLD MINER OSCILLATOR

We got a nice buy signal, Apr 2, and confirmation Apr 4, so IMO, now we will see some basing behaviors before we get a BREAK-OUT from the box, which would include a BREAK-Out over and above the 50 DMA, using the \$HUI or GDX. You can see from the "Window" of time provided by the BREAK-OUT BOX that it could take some time, but since we are, IMO, in a Base area of support, according to our "Floating" measures, the most probable direction is that of least resistance, which, IMO (again), is to the Upside

GoldMiner Index Analysis & Stocks April 11, 2014

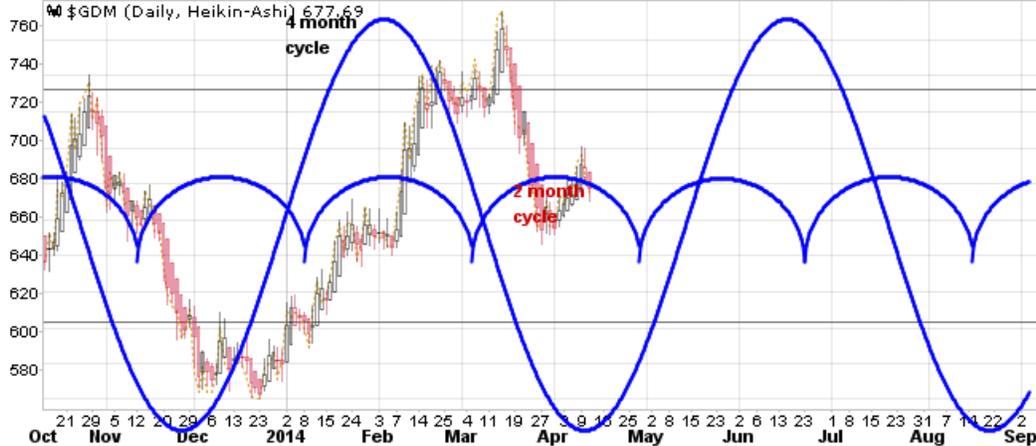

I counted about 30+ stocks in this weeks PPP that were above their 50 DMA's, had good accumulation, and about 1/3 of them on 60 Min charts stealth breakouts, as well as that many already in daily breakouts.

And there are bunch more where they came from as well in 60 min Stealth configs for your potential profits.

The flip side of that for the Savvy and Aware investors is to set some Snares in the form of Limit Orders for stocks they want to acquire before the next rally bursts forth.

<<< HERE we find it easy to see that the Longer term 3

mo cycle pressed to the bottom and ready to resume an upward parabola, while the 2mo cycle continues to press down till the end of April. Thus, so Choppy as it may be, IMO, the trend up is resumed as we watch.
