

## GOLD MINER OSCILLATOR MAY 5, 2014

**GIMBO CONFIRMING Previous Long Signals**  
So I know this chart appears week after week. There would be no need if it were not working. I have no magic for what will happen MAY 10, it was a place where the SRL's exited the Box of Support I drew.

Would I be pushing the point saying we are yet :  
**CLIMBING THE WALL OF WORRY?**  
Honestly I can think of no other way to describe the lack of enthusiasm amongst PM fans.

<< That's the raw GIMBO, Gold Miner Oscillator.

The False Negative of Fri May 2, was again a good place for re-confirmation of the Original April 2, Long Signal.

For all the negative talk, it seems that the CRIMEX Fraud Notation cannot stay below 1280 U\$D. Seems like FiatNam for them, a battle they fight with overwhelming assets yet, cannot win, like trying to nail jello to the wall.  
**This is what I think the concern is.**

**GDX NYSE**  
06-May, 15:05 ET, daily, C: 24.28, Chg: -0.13  
No New P&F Pattern  
Traditional, 3 box reversal chart  
Bullish Price Obj. (Rev.): 43.0

The shorts are running out of maneuver space, as uptrend lines start converging, no where for them to go.

**GIMBO CONFIRMING Previous Long Signals**

Lets look at the freaky volatility hitting the metals, and the rules to tell when it's a smack down:

1. Always imposed at time of **ILLIQUIDITY**, middle of the night or so for their skullduggery.
2. Never a "drift-down" due to lack of interest, but rather a **SPIKE-Down** !
3. **Volume at tsunami level**, larger than the exchanges, some % of national or Global production.
4. Always **Un-Economic**, in that it is **DUMPED**, rather than fed into the system to make the most profit.
5. **Rebound** and "Back & Fill" movements eventually render the Smack-Down impotent by returning the metal to a higher level, **recapturing** all the previous downmove

These are first five signs I can think of off the top of my head as I work to understand how the shenanigans of the US and Global Western Govts fail to address let alone resolve Global Systematic Financial Failure.

Published that in my blog Jan 2014, after watching all the silliness of "Smack-Downs".

So far this is total trench warfare, each side advancing 100 yards only to lose it in the next artillery barrage. Now so far, the PM Complex is moving forward. What is going to scare the daylights out of the shorts is when the glacial pace starts galloping forward. We have that kind of illustrated in a confirming buy signal in our Gold Tracker, MNT.To, the Royal Canadian Mint Gold Tradeable Receipt which is the inventory from which they fabricate their products.

The actual cash price of 1/100<sup>th</sup> of an oz of gold reflected here in Canadian dollar form has had an upside cross above the Chandelier Exit line, which in turn has moved above the Money Flow Line, in the Green Box, illustrating the opposite action

of the RED and BLUE Boxes of March of this month. Now as we see the Long Term Chart of REAL CANADIAN GOLD we see the trend in full swing, correction in place, and basing, with a Golden Cross in place as well. This is one of the measures that is setting up to give us an advance heads up on a LONG TERM BUY signal, my guess, during the month of May. We will see what happens but I think this is gonna be a House Odds-On favorite bet.
