Gold Miner Oscillator Long signal week of June ended June 6

filling and the symbolic beating that Gold Bugs are taking. Symbolic, not real as it can be. PM complex grinding it out 4 yards a carry, with the occasional punt. BUT, again, we have Ball control so they can keep punishing us but POSSESSION is 9/10 of the game. The situation seems, in tatters for all that matter, and so I opt to keep with the LONG Signal of Jun 5. Maddeningly slow and punishing as this may see, it is my opinion (IMO), that this leads to the launch ramp for another rally into the summer and autumn months as has happened seasonally in the past. Slow but happening !!! **Despite calls for some, to short this PM & Miner Sector, but it seems, as far down, and as many times as we have bounced off the bottom, a larger risk seems to me that the Seasonal Rally starts without us, if we do not pay attention. I do not see any real risk in the picks of your choice or PEAK PICKS, held in moderate quantity and with a stop, until we are comfortable with the developing trend. All the markers are in Rebound position, and nothing over-extended to the upside. Cycles seem to have been a bit scrambled but I am working to get a clear picture of them, ASAP. SUBSCRIBE HERE & NOW! To PEAK PERFORMANCE PICKS @ no-risk. If not satisfied, let me know and I refund you NO-QUESTIONS-ASKED. GOLD MINER OSCILLATOR Analysis

June 10, 2014

Since a number of feed sources are down today, what we know is that GDX is up along with the PM Complex, so I think what is out there is positive. Will ck back and publish it on the blog when it all updates.

What I found fascinating while reviewing the **5 RULES OF SMACKDOWN**

is the volume of paper was 2.5X NEWMONT MINING's 2013 Production in OZ!

FAST FORWARD to NEWMONT's AGM, where the CFO stands up and explains that he was able to sell ALL of NEWMONT's production for this year, last year, and a half a year forward in ONE TRANSACTION ! CAN you hear the applause when he tells them that he so they could get their \$\$ all at once even though they probably left btwn \$100 – 200 Million on the table by smacking it so hard it cleaned ALL bids ! Some how I think the stockholders would have lynched that CFO right then and there. Normal Liquidation, NOT !!

I thought you might enjoy that comparison.

Lets look at the freaky volatility hitting the metals, and the rules to tell when it's a smack down:

1. Always imposed at time of **ILLIQUIDITY**, middle of the night or so for their skullduggery.
2. Never a "drift-down" due to lack of interest, but rather a **SPIKE-Down** !
3. **Volume at tsunami level**, larger than the exchanges, some % of national or Global production.
4. Always **Un-Economic**, in that it is **DUMPED**, rather than fed into the system to make the most profit.
5. **Rebound** and "Back & Fill" movements eventually render the Smack-Down impotent by returning the metal to a higher level, **recapturing** all the previous downmove

These are first five signs I can think of off the top of my head as I work to understand how the shenanigans of the US and Global Western Govts fail to address let alone resolve Global Systematic Financial Failure.

Published that in my blog Jan 2014, after watching all the silliness of "Smack-Downs".
