

GOLD MINER OSCILLATOR
for 321Gold.com
June 19, 2014

"IMO, no matter how you slice it, this is a bottom." That was my comment June 9. I'll stand on that.

Right now BUBBA above the Gold Miner Volume Oscillator is 2/3 the way up its scale in 10 days. So now we will again climb the "WALL OF WORRY" that over-cautious investors love so much, and wait until we are topped out to get in and burned underwater at least for the short term. The CDNX, Canadian Venture Exchange Price and Accumulation numbers are running for cover in the Ichi Cloud like a scalded rat.

So if you had to guess timing what would you say, Canada Day, July 4th, long weekends for the turn down? How much of a turn-down, a hesitation head-fake and launch or real correction? As I look at my wall calendar, I see we are 2/3 done the month of June, and Bubba is 2/3 done his run to NO-BUY ZONE, sooo, while others agonize, about it being too high to get in, and then jump in at the last minute, I say, stand pat, reshuffle your hand, and be ready to bolt when the SELL TIME comes, meanwhile STOPS will keep you from getting blindsided while you try to be normal and live your lives. Freak not, I am monitoring and sending my subscribers two new Rec's tonite, as well as covering the strongest stocks. Subscribe and be one of those getting this info first so no one can front-run you. Did you get out of your options while the premiums were still hot and full, or did they deflate before your exit? We got ours nice and hot and juicy !!

Truthfully? IMO, we are headed for the Straits of Hell. Its on my blog, you can index it. Its gonna be one helluva trip for the shorts, I think. I think time will show how much trouble they are in.

Oh did I forget to mention that the Bullish % of GDM stocks kicked up a notch yesterday?

Follow this [Link <](#) and you will find captioned atop that chart underneath the title of "User-Defined" Mode, the following:

"STATUS : Bull Correction March 25, 2014" meaning that even after the dump in March, this Sentiment indicator has never turned bearish. Many doubted but I don't think the jury was ever out.

GOLD MINER OSCILLATOR Analysis

Between the 4 Goldbugs facts from hell and the 5 rules of smack-down and the Gold Miner Oscillator, it couldn't be more simple. Its all you need and nothing else.

5 Rules of Smack-Down

Lets look at the freaky volatility hitting the metals, and the rules to tell when it's a smack down:

1. Always imposed at time of **ILLIQUIDITY**, middle of the night or so for their skullduggery.
2. Never a "drift-down" due to lack of interest, but rather a **SPIKE-Down** !
3. **Volume at tsunami level**, larger than the exchanges, some % of national or Global production.
4. Always **Un-Economic**, in that it is **DUMPED**, rather than fed into the system to make the most profit.
5. **Rebound** and "Back & Fill" movements eventually render the Smack-Down impotent by returning the metal to a higher level, **recapturing** all the previous downmove

These are first five signs I can think of off the top of my head as I work to understand how the shenanigans of the US and Global Western Govts fail to address let alone resolve Global Systematic Financial Failure.

Published that in my blog Jan 2014, after watching all the silliness of "Smack-Downs".

4 Gold Bug Facts From Hell

HUI broke out of a Monthly Falling Wedge Spring 2013

HUI created a double bottom based on 4.3 year cycle Spring of 2013

STRAITS of HELL Gap created on HUI 280-300 in the Tax Day Massacre, creating a 15 month "Abandoned Baby".

The Tax Day Massacre set up the formation of a 15 month INVERTED Head & Shoulders with its lowest (HEAD) at the beginning of 2014.

This is going to be far more fun than anyone planned, for Goldbugs.....
