

**GOLD MINER OSCILLATOR > *Forward Reckoning*®**

**June 23, 2014** for 321Gold.com

This stuff is clear, you don't need a Weatherman, but also if you wait till its "ALL CLEAR" you will get in, in time to get whacked by any correction. Take your choice. We have ideas on direction and timing, and are humanly as right as possible, & we work to tactically use those ideas for max gain and least risk. We don't wait. We act. **Right Now we are correcting** and may be so until, say July 7-10, based on correcting half

the advance from May 29, thus, going down to the Zero line is in my odds. Keep your stops, stash your cash, it IMO, Scalpers can take advantage of this potential Local Top and subsequent Correction.

***"IMO, no matter how you slice it, this is a bottom."*** *That was my comment June 9.*  
*It Stands*

We got our LOCAL LOW Buy Signal June 2, so its been a 22 day run so far, so I am thus looking for an 11 day potential correction, flat or otherwise. Fear not, stand away, let it fall, operate your stops.....not too crazy, but rather prudent and rational, I think.

**ANY REASON WE CAN'T DO THAT FOR YOU ??**

This will be the confirmation the "Old Guys" are looking for so I suspect bigger volume on the next up leg !!

**BPGDM** which some watch now kicked up to 36.7%, a net 20% gain from the 1<sup>st</sup> week of June to now

Follow this [Link <](#) and you will find captioned atop that chart underneath the title of "User-Defined" Mode, the following:

**"STATUS : BULL CONFIRMED, JUNE 20, 2014"** Not only did the measure fail to turn negative, it ramped, maybe not enuf to lose the doubters but enuf to insure those paying attention could make money. Many doubted but I don't think the jury was ever out.

**Thus I expect this FIRST Bull leg to correct SOME.**

Tactically, stacking during corrections seems a good idea as well. **DG**

## **GOLD MINER OSCILLATOR Analysis**

for 321Gold.com

**June 23, 2014**

**Between the 4 Goldbugs facts from hell and the 5 rules of smack-down and the Gold Miner Oscillator, it couldn't be more simple. Its all you need and nothing else.**

### **5 Rules of Smack-Down**

**Lets look at the freaky volatility hitting the** metals, and the rules to tell when it's a smack down:

1. Always imposed at time of **ILLIQUIDITY**, middle of the night or so for their skullduggery.
2. Never a "drift-down" due to lack of interest, but rather a **SPIKE-Down** !
3. **Volume at tsunami level**, larger than the exchanges, some % of national or Global production.
4. Always **Un-Economic**, in that it is **DUMPED**, rather than fed into the system to make the most profit.
5. **Rebound** and "Back & Fill" movements eventually render the Smack-Down impotent by returning the metal to a higher level, **recapturing** all the previous downmove

These are first five signs I can think of off the top of my head as I work to understand how the shenanigans of the US and Global Western Govts fail to address let alone resolve Global Systematic Financial Failure.

Published that in my blog Jan 2014, after watching all the silliness of "Smack-Downs".

### **4 Gold Bug Facts From Hell**

**HUI broke out of a Monthly Falling Wedge Spring 2013**

**HUI created a double bottom based on 4.3 year cycle Spring of 2013**

**STRAITS of HELL Gap created on HUI 280-300 in the Tax Day Massacre, creating a 15 month "Abandoned Baby".**

**The Tax Day Massacre set up the formation of a 15 month INVERTED Head & Shoulders with its lowest (HEAD) at the beginning of 2014.**

This is going to be far more fun than anyone planned, for Goldbugs.....
