**Sell and/or

Last week I  
mentioned a  
sequence of  
events that  
included a spike  
correction, a flat  
correction, and a  
catapult move.

Markets don't move by my mind or hand and thus any of these seems likely one as another to me, as in, a  
**(StockChartsLink)>CATAPULT move.**

My point here in P & F is that in the ETF's the DANGER POINT (red box) is far below the current price. In the AVERGES it is pretty close, which again speaks to me how they are organized and administered, if I was totally suspicious ( I AM !!). In the case of GDXJ, there is CATAPULT potential in the next move indicated by the GREEN BOX !!

Talking about **NO~FEAR !**, IMO, the opposition has no more quantum cache of Gold or they would have sold us **DOWN HARD**, as they did with the BOE 1300 Tonne stash in the **TAX DAY MASSACRE**.  
**There is no GOLD left for them to beg, steal or borrow !!!**  
 From here its all hot air, hype, MSM hysteria,BS, etc, etc. IMO.

BPGDM which some watch now kicked up to 36.7%, a net 20% gain from the 1<sup>st</sup> week of June to now

Follow this [Link <](#) and you will find captioned atop that chart underneath the title of "User-Defined" Mode, the following:

**"STATUS : BULL CONFIRMED, JUNE 20, 2014"** Not only

did the measure fail to turn negative, it ramped, maybe not enuf to lose the doubters but enuf to insure those paying attention could make money. Many doubted but I don't think the jury was ever out.

This week's **PEAK PICKS bonus** is the "Minor Miners" that no one is watching. Small and unknown, they either are sitting on large feasible deposits, have started mining them or have other specific issues working for them, so that THEY are **BREAKING OUT**, whether or not everyone else is BREAKING down. Ya gotta know, they wont be MINOR for ever, as I see someone or something out there, lurking, hunting Miners with deposits capable of replenishing the reserves of the Big Guys. Tell me you don't feel that too? We got a lot of them corralled with Technical Analysis. Not all will survive, but a lot will do exceedingly well, in our opinion.

I've followed both of these stocks for a minimum of 2 yrs each, and waited till now. What you see on the top panel is the Stealth Volume Index. Judge for yourself. There are a minimum of a dozen

**FRONT RUN for YOURSELF This Time !!!!**

**I** watch a lot of guys trying to hit that HOME Run with 1 stock . This may not be it but it will be stocks like this, that make that **HOME RUN IMO.**

Mathematically this is where those home runs must come from

**GOLD MINER OSCILLATOR Analysis**

**Between the 4 Goldbugs facts from hell and the 5 rules of smack-down and the Gold Miner Oscillator, it couldn't be more simple. Its all you need and nothing else.**

**5 Rules of Smack-Down**

**Lets look at the freaky volatility hitting the** metals, and the rules to tell when it's a smack down:

1. Always imposed at time of **ILLIQUIDITY**, middle of the night or so for their skullduggery.
2. Never a "drift-down" due to lack of interest, but rather a **SPIKE-Down** !
3. **Volume at tsunami level**, larger than the exchanges, some % of national or Global production.
4. Always **Un-Economic**, in that it is **DUMPED**, rather than fed into the system to make the most profit.
5. **Rebound** and "Back & Fill" movements eventually render the Smack-Down impotent by returning the metal to a higher level, **recapturing** all the previous downmove

These are first five signs I can think of off the top of my head as I work to understand how the shenanigans of the US and Global Western Govts fail to address let alone resolve Global Systematic Financial Failure.

Published that in my blog Jan 2014, after watching all the silliness of "Smack-Downs".

**4 Gold Bug Facts From Hell**

**HUI broke out of a Monthly Falling Wedge Spring 2013**

**HUI created a double bottom based on 4.3 year cycle Spring of 2013**

**STRAITS of HELL Gap created on HUI 280-300 in the Tax Day Massacre, creating a 15 month "Abandoned Baby".**

**The Tax Day Massacre set up the formation of a 15 month INVERTED Head & Shoulders with its lowest (HEAD) at the beginning of 2014.**

This is going to be far more fun than anyone planned, for Goldbugs.....
