This is it! There has never been and there is not now anything in the world of markets that can exceed the power, the strength, and the dynamic rapid rise that follows the completion of an extremely rare *Running Flat Correction* in a bull market. It is truly an *Impossible Dream* come true for those owning gold, silver, and their shares. However, it is a *Nightmare* for those in denial of the truth.

Running Flat Correction

THE CORRECTION IS COMPLETE.

GOLD QUARTERLY

Running Flat Correction

SILVER QUARTERLY

How can we tell that the huge rise in gold from the low of \$681.00 to the high of \$1,923.70 was a corrective [B] leg in a *Running Flat Correction*? The answer is simple and obvious. When the Dollar Index trends up, gold, and silver trend down. The Dollar Index bottomed at 71.05 in the June quarter of 2008. Just prior to that gold topped at \$1,033.90 in the March quarter of 2008 and began its correction. They do not *TREND* in the same direction.

GOLD QUARTERLY

DOLLAR INDEX QUARTERLY

The Dollar Index made a double top and refused to make a new high. It has started moving down. The Euro FX made a double bottom and refused to make a new low. It has started moving up. They have reversed directions. *The Impossible Dream is underway!*
