RONALD L. ROSEN
February 29, 2016

REPORT

To my knowledge other than Ron Rosen there is not another soul on the face of this earth that has mentioned or written about the magnificently bullish *Running Flat Correction* in gold and silver. This is a correction that when complete is telling us loud and clear that the U. S. Dollar price of gold is moving up to heights that will astonish the most bullish gold bugs.

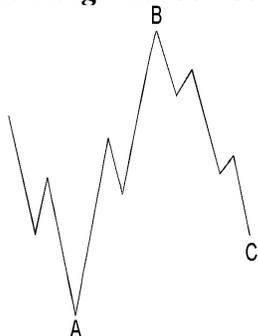

THIS CORRECTION IS COMPLETE!

“The difference between the gold Major Wave IV correction in the 1970’s and the current Major Wave IV correction is that the current correction is not common! It is *extremely uncommon*. This correction portends a move that is “so powerful.” I repeat, **SO POWERFUL...SO POWERFUL...SO POWERFUL!!!** The reason for repeating **SO POWERFUL** is that once the move begins it may be emotionally impossible to get back in if you sell before the move nears completion. Completion of this bull move should be heralded by a runaway price.” Ron R. October 16, 2015

.....

“The forces in the direction of the larger trend are *so powerful* that the pattern becomes skewed in that direction.” E. W. P.

Running Flat Correction

I would ignore every negative statement written or spoken about gold. I would ignore every comment calling for a correction. We are not witnessing a normal bull market in gold. Yesteryears bull market is not an accurate reference for the dynamic, extremely rare, magnificently bullish show that we are about to witness in gold. This will truly be a once in a lifetime performance. When thinking about gold and silver ignore every guru on the face of this earth that is not aware of the *Running Flat Correction* in gold and silver. Remember only this, and when in doubt or concerned about a supposedly intelligent “guru’s” negative comments about gold, close your eyes and repeat over and over again:

“The forces in the direction of the larger trend are *so powerful* that the pattern becomes skewed in that direction.” E. W. P.

I repeat...

Let this become your *Mantra*:

“The forces in the direction of the larger trend are *so powerful* that the pattern becomes skewed in that direction.” E. W. P.

[mantra - Dictionary Definition : Vocabulary.com](http://www.vocabulary.com/dictionary/mantra)

<https://www.vocabulary.com/dictionary/mantra>

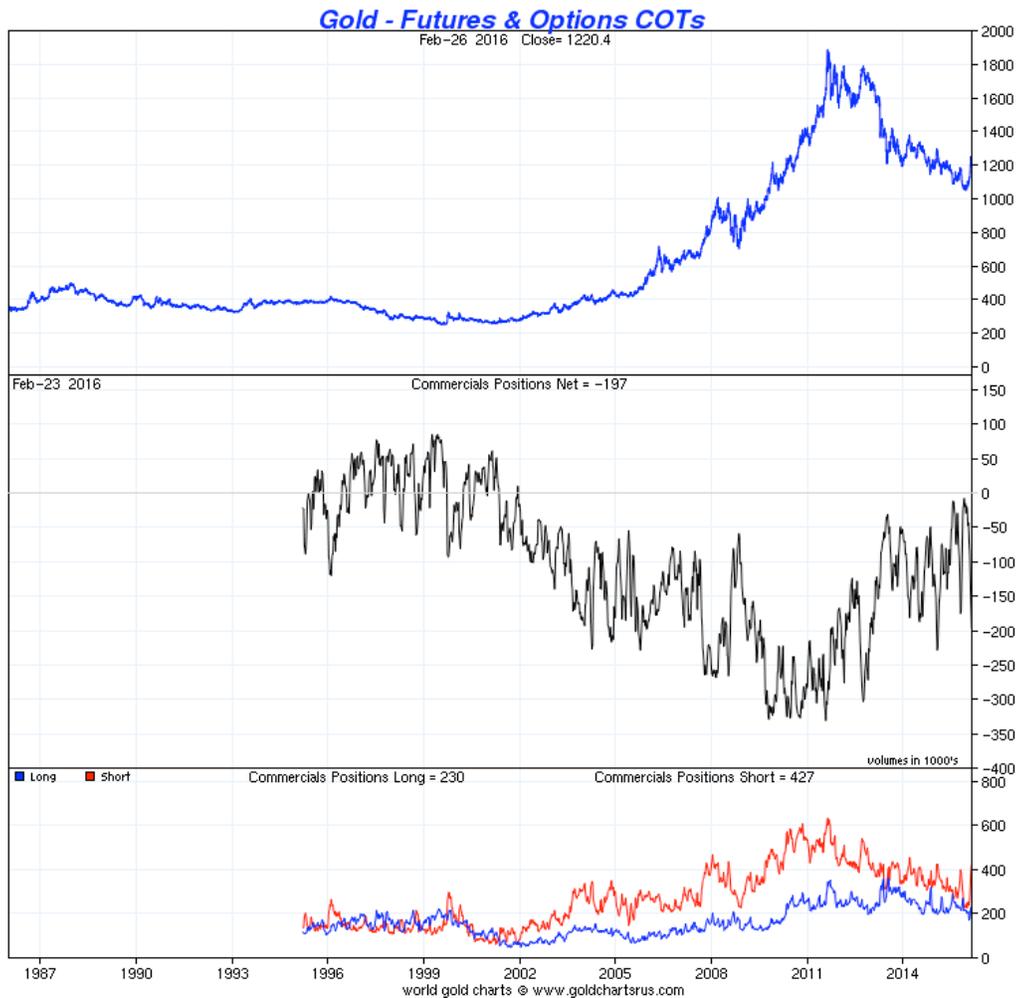

Mantra comes from a Sanskrit word meaning a “sacred message or text, charm, spell, counsel.” The Indian spiritual leader Sri Sathya Baba said, “A pure thought ...

.....

Ignore every negative statement about gold from any and every possible source. This includes negative statements from every major or minor Wall Street investment bank or brokerage source, the Federal Reserve, and so called economic experts, especially those with a Harvard, Yale, or Princeton education. So, I am saying to ignore every short, intermediate, or long term negative statement or comment about gold from any and all sources.

Just in case I have not clearly expressed my thoughts about gold, please remember this: I am bullish gold!

Oh yes, one more thing. When someone mentions excessive shorts on gold, ignore them for a very simple reason. For every short there must be a long. When the Commercials are increasing their short positions in gold the price is trending up. This chart proves that fact.

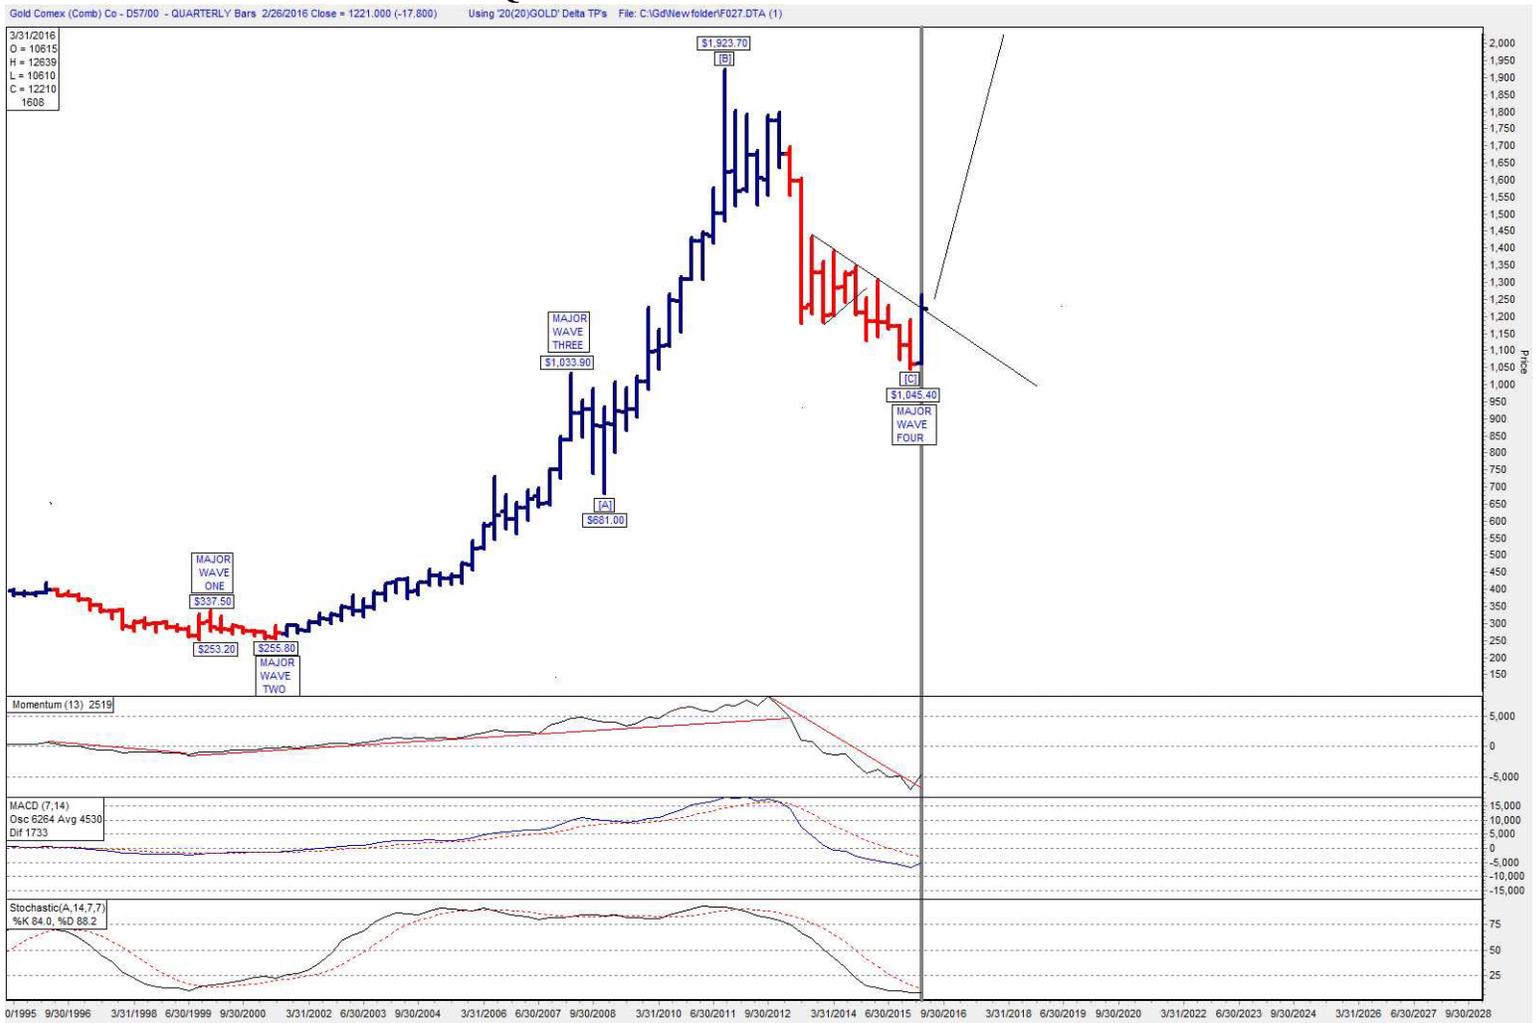

“In contrast to the stock market, *commodities most commonly develop extensions in fifth waves* within Primary or Cycle degree bull markets. This tendency is entirely consistent with the Wave Principle, which reflects the reality of human emotions. Fifth wave advances in the stock market are propelled by hope, while fifth wave advances in commodities are propelled by a comparatively dramatic emotion, fear: fear of inflation, fear of drought, fear of war. Hope and fear look different on a chart, which is one of the reasons that commodity market tops often look like stock market bottoms.” E. W. P.

.....

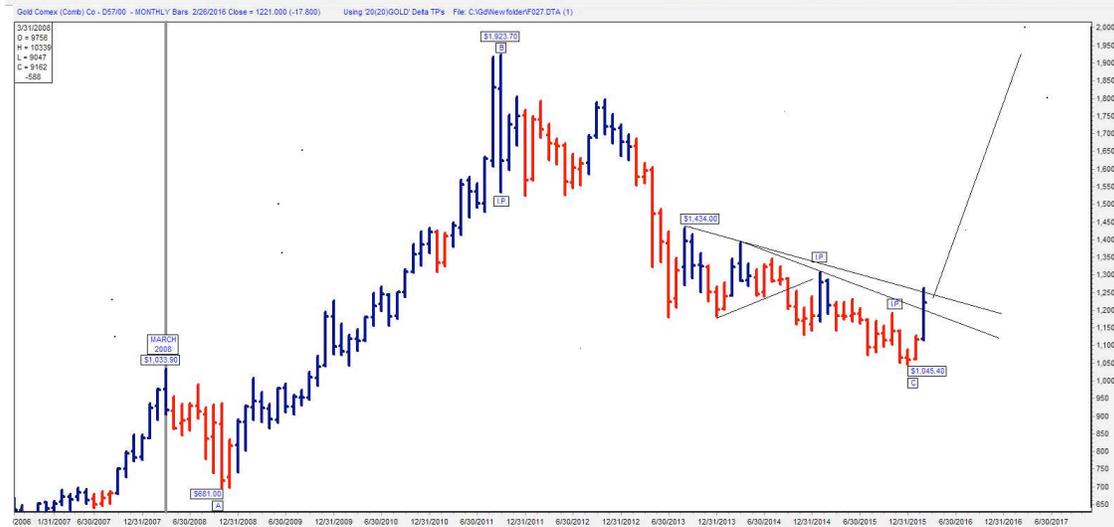

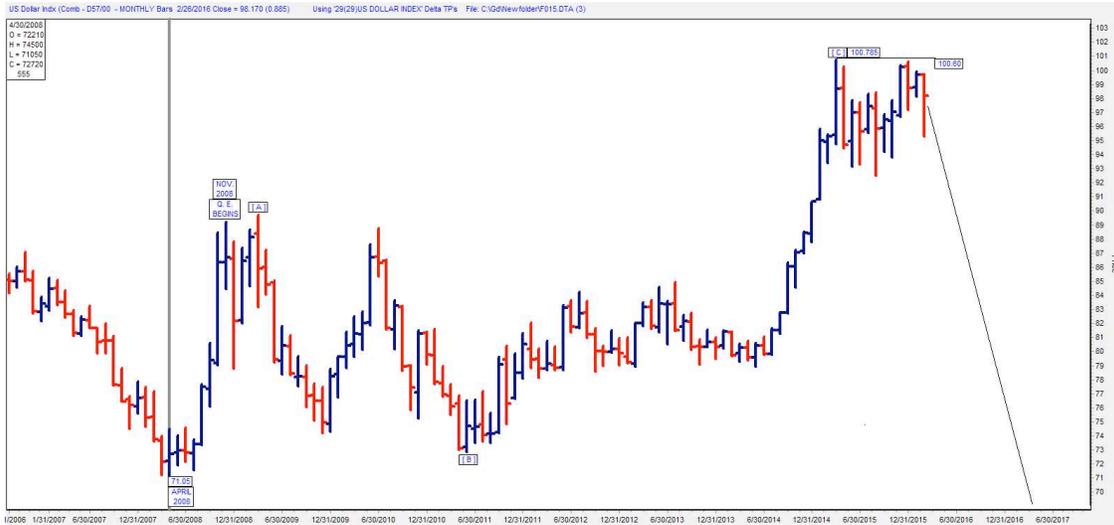

Will there be corrections in the rising price of gold? Of course there will be corrections. Every living thing has to breathe in and out. The markets are living creatures. If they don't inhale and exhale they will die! Just ignore the exhaling corrections when they occur. They won't last long.

GOLD QUARTERLY WAVE FIVE HAS BEGUN

It is impossible for knowledgeable market technicians not to recognize as fact that when the Dollar Index corrects gold corrects. It is a fact that the correction in gold is a *Running Flat Correction*!
