“A triangle *always occurs* in a position prior to the *final actionary wave* in the pattern of *one larger degree*, i.e., as wave four.” Elliott Wave Principle

The *one larger degree* is the [C] leg of the [A], [B], [C], *Running Flat Correction* in gold.

“The forces in the direction of the larger trend are so powerful that the pattern becomes skewed in that direction.” E. W. P.

Running Flat Correction

GOLD QUARTERLY

Living with the knowledge of coming corrections and selloffs in gold, silver, and their shares no matter how vicious is a great big ho hum laugh compared to what these men had to live with, endure and die for. If you are bothered, upset, and frightened when the precious metals selloff, take another look at these pictures. We are going to make a bundle of money. 40,000 Americans were simply bundled up and shipped home dead. No complaints about corrections and selloffs when they occur, please. They will arrive and as far as I'm concerned piss on them!! The result of victory for us is shown on page 1.

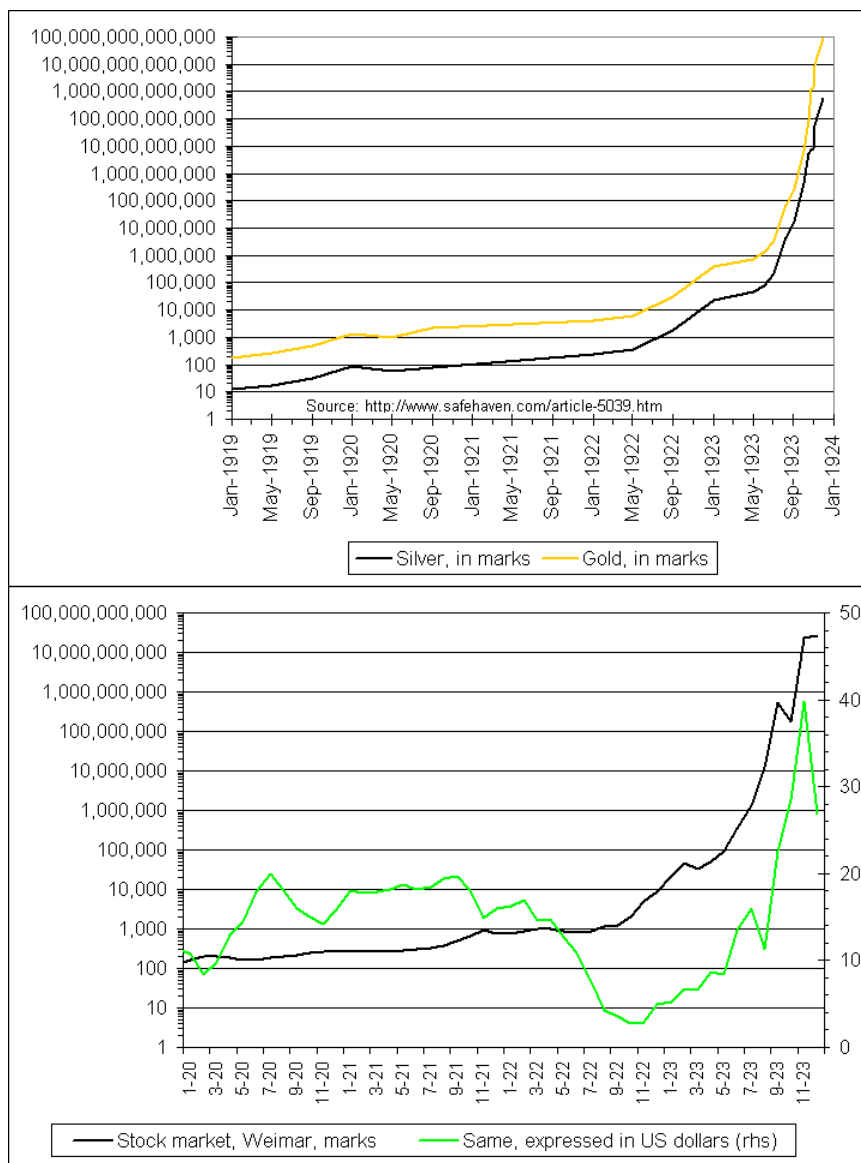

Korean War was a bloodbath in which 40,000 American troops, 500,000 North Korean and Chinese soldiers and at least 2.5 million civilians all died

If our almost totally non-combat experienced political leaders and the Federal Reserve once again panic as the stock averages decline they may embark on a plan that produces an electronic type Weimar Republic hyperinflationary disaster.

Under that scenario the stock market will continue to rise but gold and silver will accelerate their rise to an extent that mimics the price disaster of the Weimar Republic. These charts show how much greater was the rise in the price of gold and silver compared to their stock averages.
