REPORT

\$21.44

[GCF of 21 and 44 - Greatest Common Factor of 21 and 44 - Times Table](https://times-table.net)
https://times-table.net > Greatest Common Factor

“GCF of 21 and 44: Here you can find all about the greatest common factor of 21 and 44, including 3 methods to compute it, along with a calculator. ... The gcf of 21 and 44 is the largest positive integer that divides the numbers 21 and 44 without a remainder. Spelled out ... The most important properties of the gcf (21,44) are: ”

.....
The key to a bullish monumental breakout in silver is a close over the price of...

\$21.44

Hi Ho Silver

The top in silver occurred at the price of \$21.44 which was Major Wave Three. From that point forward the A, B, C, Running Flat Correction began. This Correction bottomed at \$13.62 in December 2015. Major Wave Five began at the low of \$13.62.

“The forces in the direction of the larger trend are so powerful that the pattern becomes skewed in that direction.” E. W. P.

Running Flat Correction

SILVER QUARTERLY

A breakout above the Major Wave Three high of \$21.44 should signal the start of a violent bull move up. The extent of this violent bull move up should cause silver mining shares to have an even greater bull move up.

SILVER QUARTERLY

The rally in silver that began at the low of \$13.62 naturally paused just before the break out price of \$21.44. The stop in this rally pause occurred at \$21.225.

SILVER MONTHLY

The Long Term Delta (LTD) turning points for silver and gold are available with a subscription to THE ROSEN MARKET TIMING LETTER. If you are interested please contact

PERRY @ trendpl@triad.rr.com

The biggest moves tend to occur on either side of Delta # 1. I have placed the future LTD # 1 and LTD # 2 in the high position. The reason for doing this is explained on the next chart.

SILVER MONTHLY

As shown on this chart LTD # 1 and LTD # 2 have been in the high position during the rising portion of this silver bull market. The highest probability is that LTD # 1 and LTD # 2 will continue to arrive in the high position during the final Major Wave Five of this silver bull market. The following description of Major Wave Five indicates why to the highest probability LTD # 1 and LTD # 2 will arrive in the high position.

“In contrast to the stock market, *commodities most commonly develop extensions in fifth waves* within Primary or Cycle degree bull markets. This tendency is entirely consistent with the Wave Principle, which reflects the reality of human emotions. Fifth wave advances in the stock market are propelled by hope, while fifth wave advances in commodities are propelled by a comparatively dramatic emotion, fear: fear of inflation, fear of drought, fear of war. Hope and fear look different on a chart, which is one of the reasons that commodity market tops often look like stock market bottoms.” E. W. P.

SILVER WEEKLY

The breakout above the previous high of \$6.44 in the March quarter of 1979 led to a monster bull market high of \$41.50.

SILVER QUARTERLY 1972 TO 1980

Once the breakout occurred in January 1979 the move was straight up with momentary corrections. The actual breakout above the \$6.445 high was preceded by a test of the high of \$6.445 three months earlier. The current silver bull market potential breakout is following this pattern of an earlier attempt to breakout.

SILVER MONTHLY BREAKOUT 1971 TO 1980

The breakout bull move in 1979 will probably appear to have been a minor bull move when compared to the bull move we are about to witness.

SILVER WEEKLY BREAKOUT 1979

Not bad for a minor bull move! Trading this type of a bull move is not a good idea.

Once the breakout over \$21.44 takes place the best strategy is, “Hang On For Dear Life.”

SILVER MONTHLY 1979 BREAKOUT AND PEAK

**A Major Bull Move is always preceded by numerous vicious momentary selloffs.
Silver in 1979 is a perfect example of this pre bull market breakout activity known
as “Clear The Decks.”**

SILVER MONTHLY 1974 TO 1979 VICIOUS CORRECTIONS PRIOR TO BREAKOUT

The current Bull Market in silver is engaged in the same pre breakout activity.
 There will be vicious momentary selloffs all the way to the breakout above \$21.44.
 When the breakout above \$21.44 is imminent we will hear this ...[General Quarters](#).

SILVER MONTHLY 2015 TO 2018 VICIOUS CORRECTIONS PRIOR TO BREAKOUT

HMMM ... \$6.44 breakout in 1979 and \$21.44 breakout in 2018 ... what could the repetition of the number 44 possibly mean?

Number 44 Meaning

"The numerology number 44 is about business.

The numerology number 44 is about business, especially business related to building something to benefit many generations.

The essence of the numerology number 44 is a focus on efficient and conscientious business building.

44 builds for both the present and the future. It wants rewards for its work in the present and it wants to have a large positive effect on the future.

The essence of the numerology number 44 is realistic, pragmatic, efficient, disciplined, and confident. It is conscientious, balanced, and methodical with a focus on what it wants to accomplish."

After two Combat tours in the Korean War I discovered the War of Wars on Wall Street. That was 62 years ago. My first job was with Carl M. Loeb Rhodes & Co, 40 Wall Street N. Y. C.

I have been a director of Welles Wilder's Delta Society International for the past 18 years.

If you are interested in following the price of silver right up to the breakout price of \$21.44, and the bull move thereafter, a subscription to the THE ROSEN MARKET TIMING LETTER may be your roadmap. The entire precious metals complex is followed on a biweekly basis. For subscriptions please contact Perry at the Home Office.
