## PRECIOUS METALS - FOREX - STOCK INDICES - COMMODITIES

“Time is more important than price; when time is up price will reverse.”

### REPORT

We can curse, rant and shake with fear about those evil forces that keep knocking down the price of gold and silver. However, if we want to know when the highs and lows will take place we can calmly with confidence observe whether or not the next Delta Long term (LTD) turning point is a high or a low and when it is due. They have never failed.

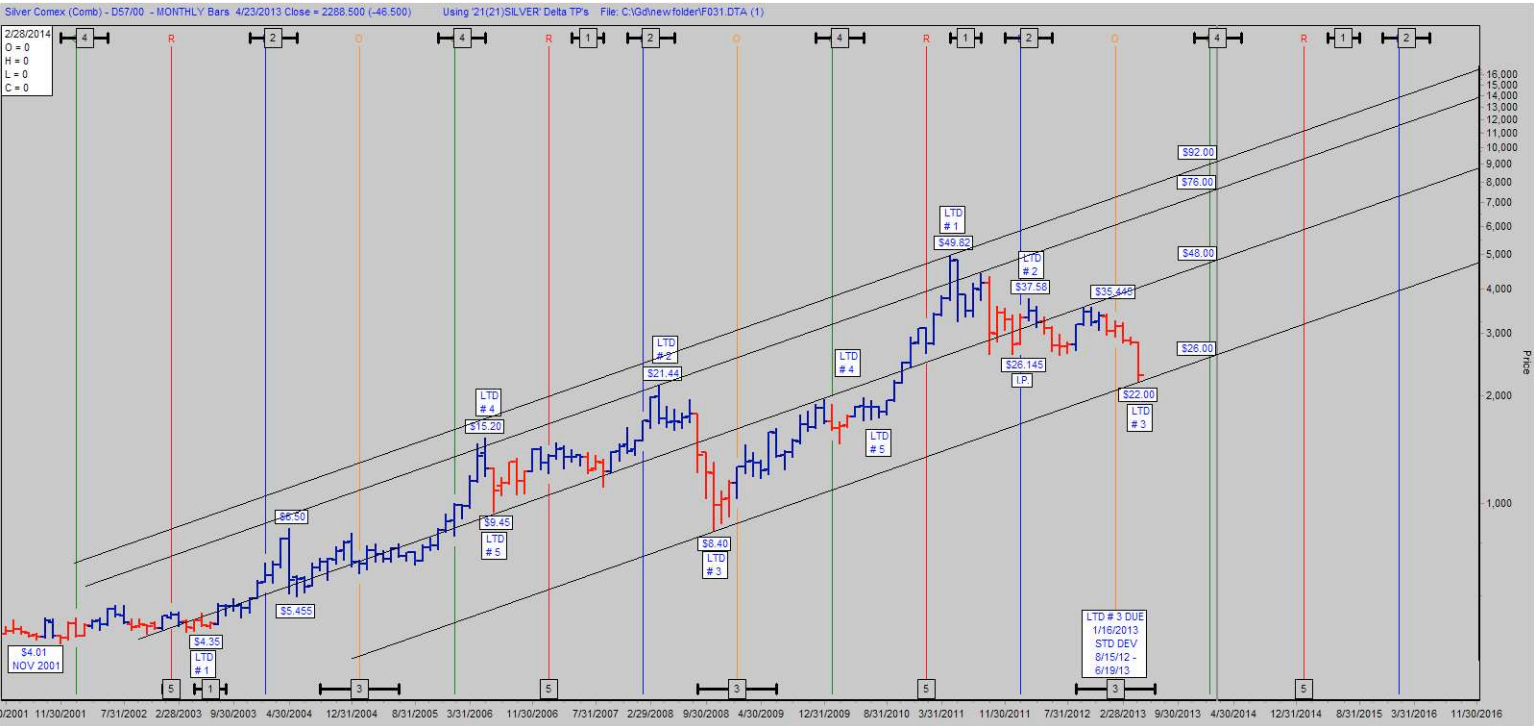

Gold by any measure is the leader of the pack. The pack consists of gold, silver, and the HUI. This monthly logarithmic gold chart shows us that a new high occurred at every LTD # 4 high and every grouping of LTD # 1 high and LTD # 2 high. Lows occurred at LTD # 3 low and LTD # 5 low. A perfect rising logarithmic channel has been in place since the bull market in gold began. Silver and the HUI clearly follow gold up and down. All three will be moving up to LTD # 4 high due February 12, 2014 (2/12/2014).
