If ever a picture told us the bottom is in this is it. This chart is perfection personified.

GOLD QUARTERLY

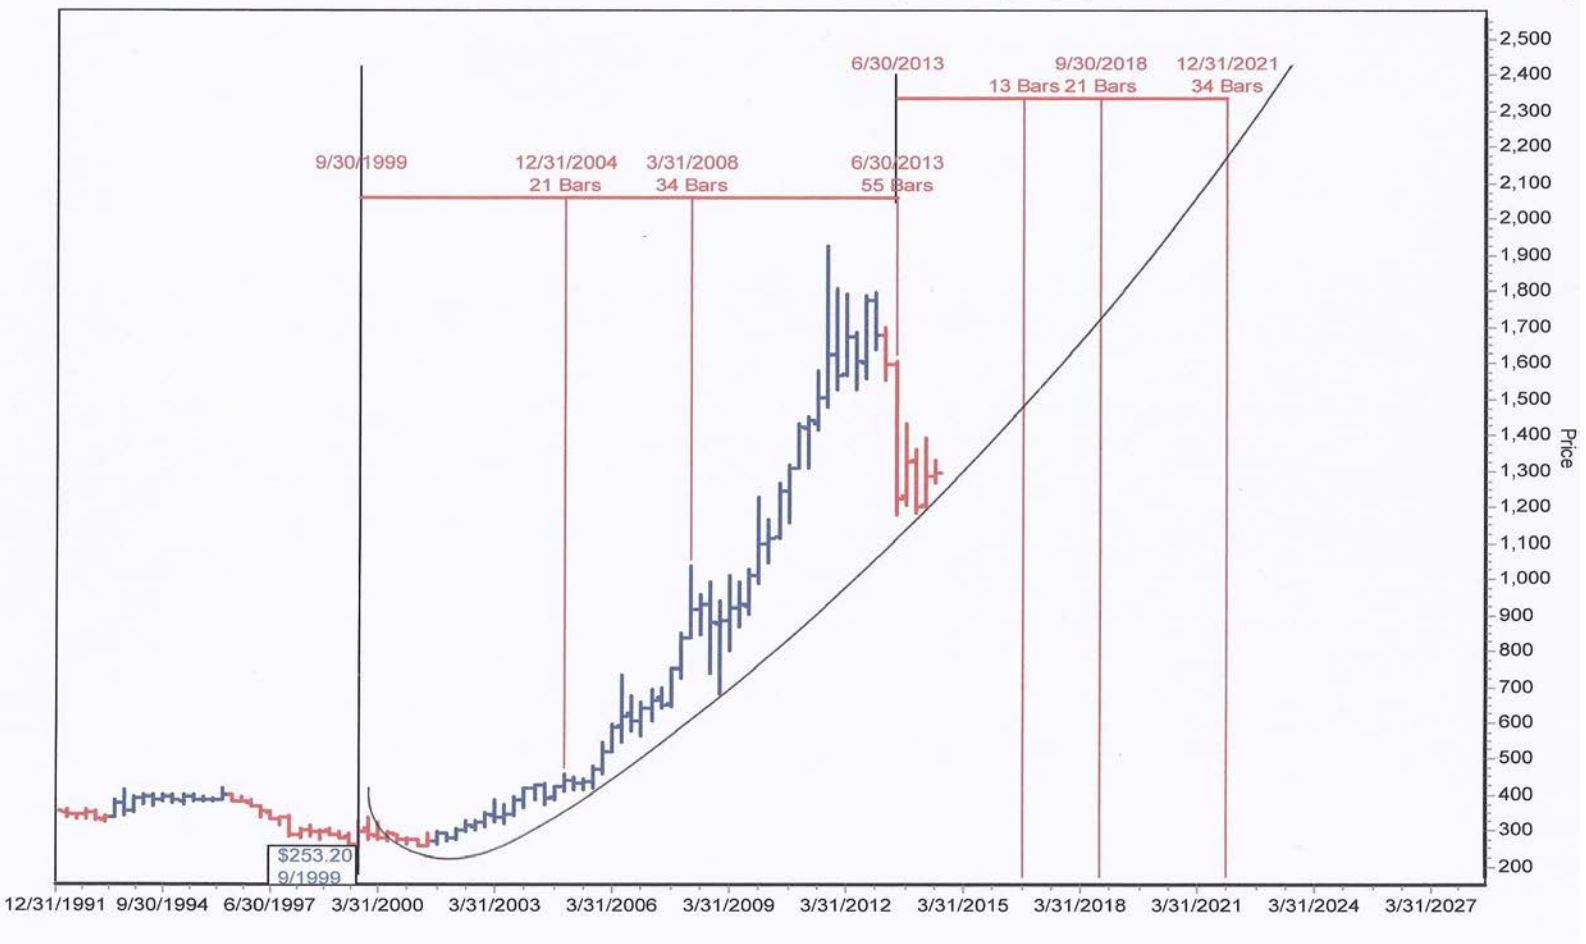

Gold Comex (Comb) Co - D57/00 - QUARTERLY Bars 5/7/2014 Close = 1288.900 (-19.700) Using '20(20)GOLD' Delta TPs File: C:\Gd\new folder\F018.DTA (1

This information cannot be found on a daily, weekly, or even a monthly chart. Old man Fibonacci with the aid of the French Curve has told us that he will teach us how to count waves. He will tell us when they top and when they bottom. A long time ago he whispered in my ear, “Don’t mess with all those x – y – w ‘s and A- B- C’s. Pick your head up and look around. You will see something really beautiful.” This one is interesting and attractive.

GOLD QUARTERLY

Gold Comex (Comb) Co - D57/00 - QUARTERLY Bars 5/22/2014 Close = 1294.400 (6.300) Using '20(20)GOLD' Delta TP's File: C:\Gd\new folder\F018.DTA (

It appears that the yearly chart of silver is showing us something fascinating. Loud and clear, it is telling us that there are 4 years between bottoms and tops. The next top might even reach \$207.00 an ounce.

SILVER YEARLY

Good old crude oil. It's given us one heck of a ride! I do believe it is hanging around the apex of this triangle for a very good reason. Could it be another trip to the moon?

CRUDE OIL MONTHLY

That line at the apex of this triangle appears to be saying, “On your mark. Get set..... .”

CRUDE OIL QUARTERLY

It's a funny thing but if you have been around a long time you tend to remember certain happenings that many young folks don't remember. In the last great bull market in commodities silver and crude oil both peaked in the same price range. That was roughly in the \$40.00 range. I wonder if they could do that trick once again.

We know that if silver reaches the upper trend line in 4 years it will be about \$207.00 an ounce. What about crude oil? Well ... if crude oil does the normal technical thing for a chart like it has, the answer is just a bit of simple mathamatics. We take the difference between the top and the bottom and add that number to the price at the apex and *voila*, we have \$207.00 for a barrel of crude oil. The math is on the crude oil chart below. I can hear the two of them singing in the background. [Download](#)

SILVER YEARLY \$207.00 AN OUNCE?

CRUDE OIL \$207.00 A BARREL?

Frankly the bears on the stock market are not bearish enough.

S & P 500 MONTHLY

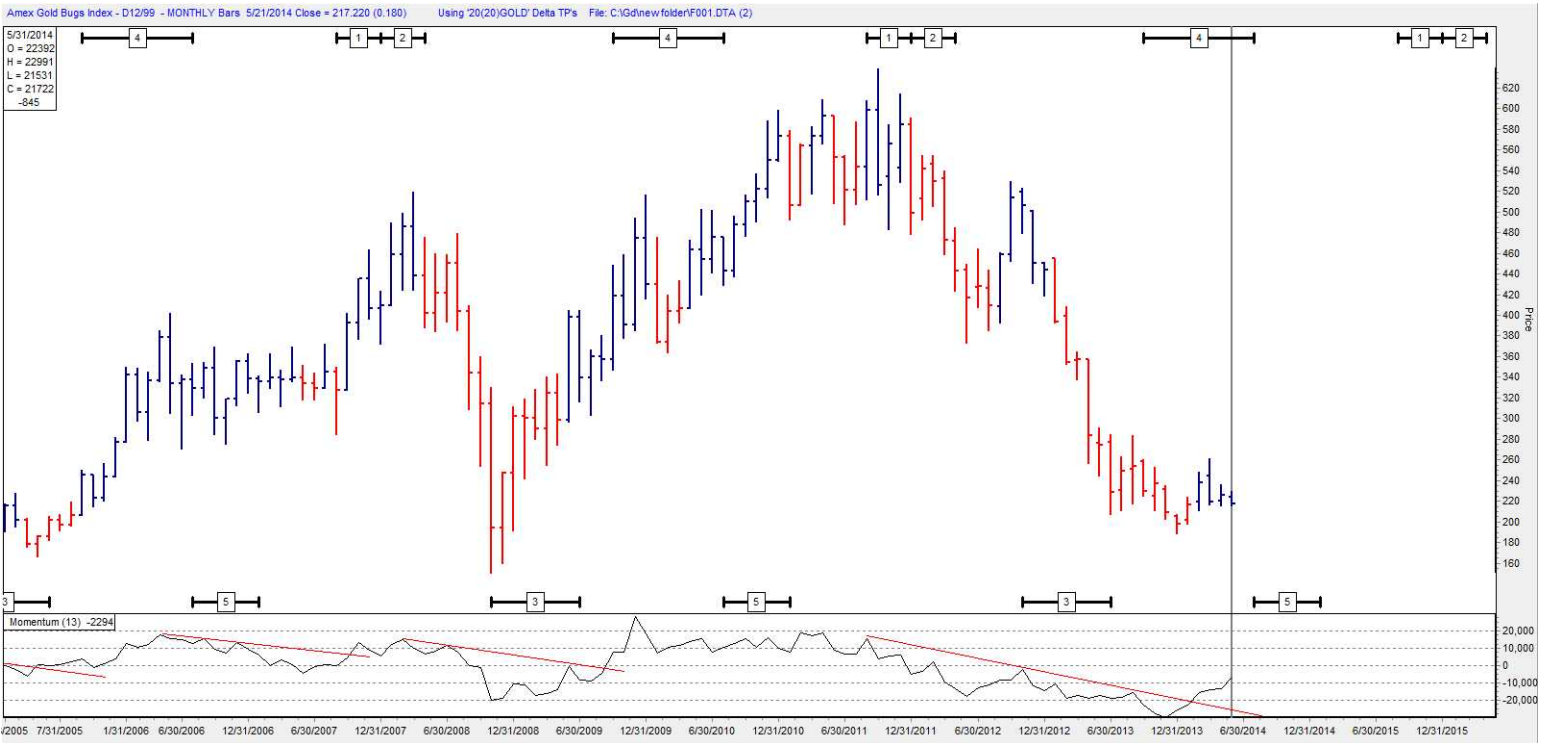

The year 1995 was a good year. However, I doubt that many stock portfolios will look very good at the end of a backward journey like that!!

S & P 500 QUARTERLY

Ever since the bull market in the HUI began every time the momentum indicator black line moved above the declining red trend line a huge move up began. The trend is definitely our friend when it gets busted on the way up. If anyone wants to join the parade now's the time.

HUI MONTHLY

MEMORIAL DAY MAY 26, 2014

[Blowin in the Wind](#)

One of these frozen assets was a friend of this old man.

I guess the war hawks would consider these men some of the frozen assets as a result of going to a limited police action. Some people never learn and never will learn.

1951-1952 Korean Waters

39. Marines reclaimed all their dead on the retreat from Changjin (Chosin) reservoir. Infiltrating Chinese soldiers stripped clothing from some of the bodies. (U.S. Marine Corps photo.)

If you want to join my Crew it will cost \$35.00 a month. You can abandon ship at the end of any month.
