### REPORT

-----

**The Dollar Index Began a Long Term Bear Market at the high in the September Quarter of 2001. A 5 wave decline bottomed at the low in the June Quarter of 2008. An A, B, C, rally followed and topped in the March Quarter of 2017. Starting in the March Quarter of 2017 the Long Term Bear Market resumed. The Dollar Index is now ...**

“As the Head and Shoulders pattern unfolds, volume plays an important role in confirmation. Ideally, but not always, volume during the advance of the left shoulder should be higher than during the advance of the head. Together, the decrease in volume and the new high of the head serve as a warning sign. The next warning sign comes when volume increases on the decline from the peak of the head, then decreases during the advance of the right shoulder. Final confirmation comes when volume further increases during the decline of the right shoulder.”

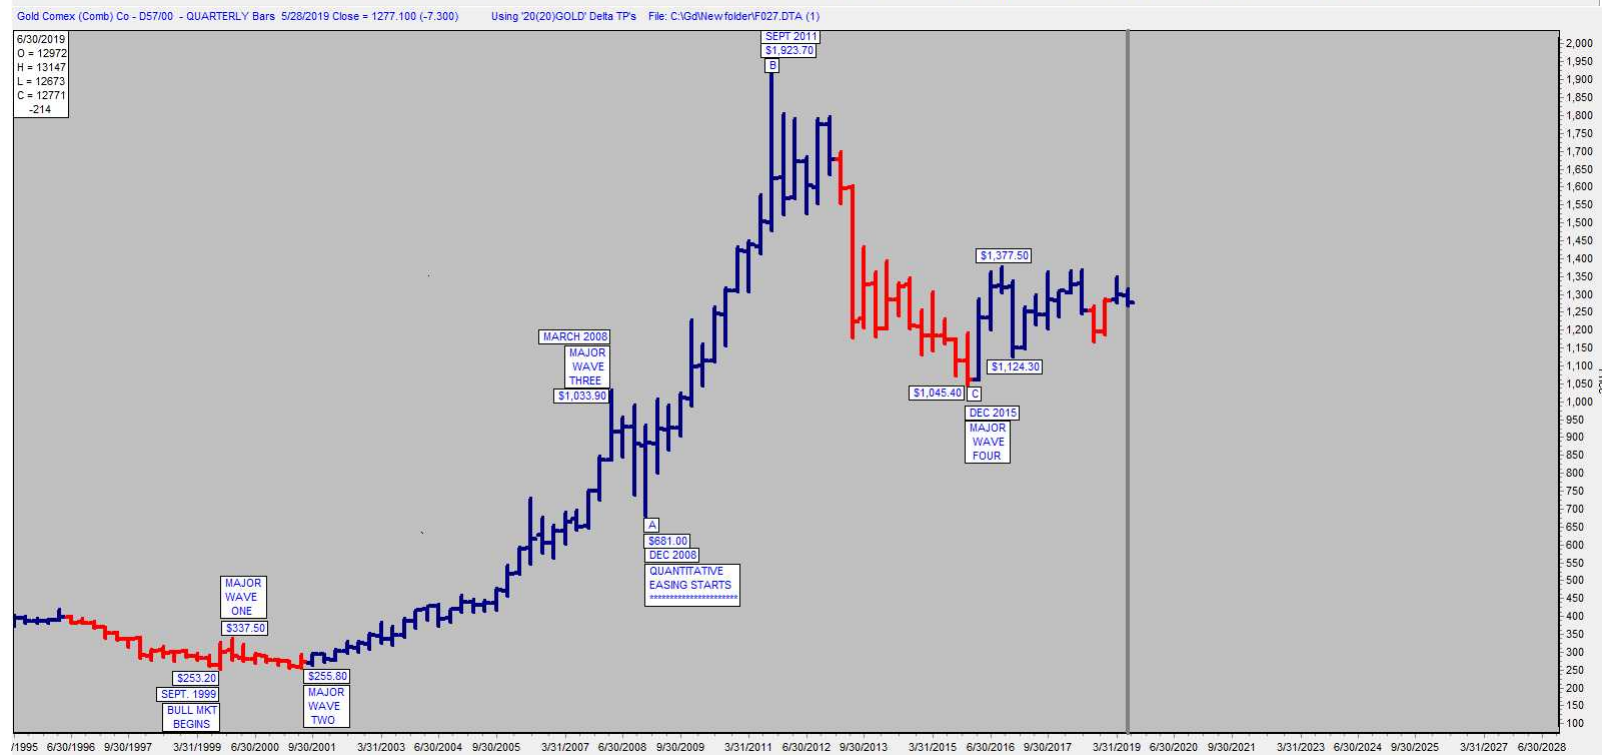

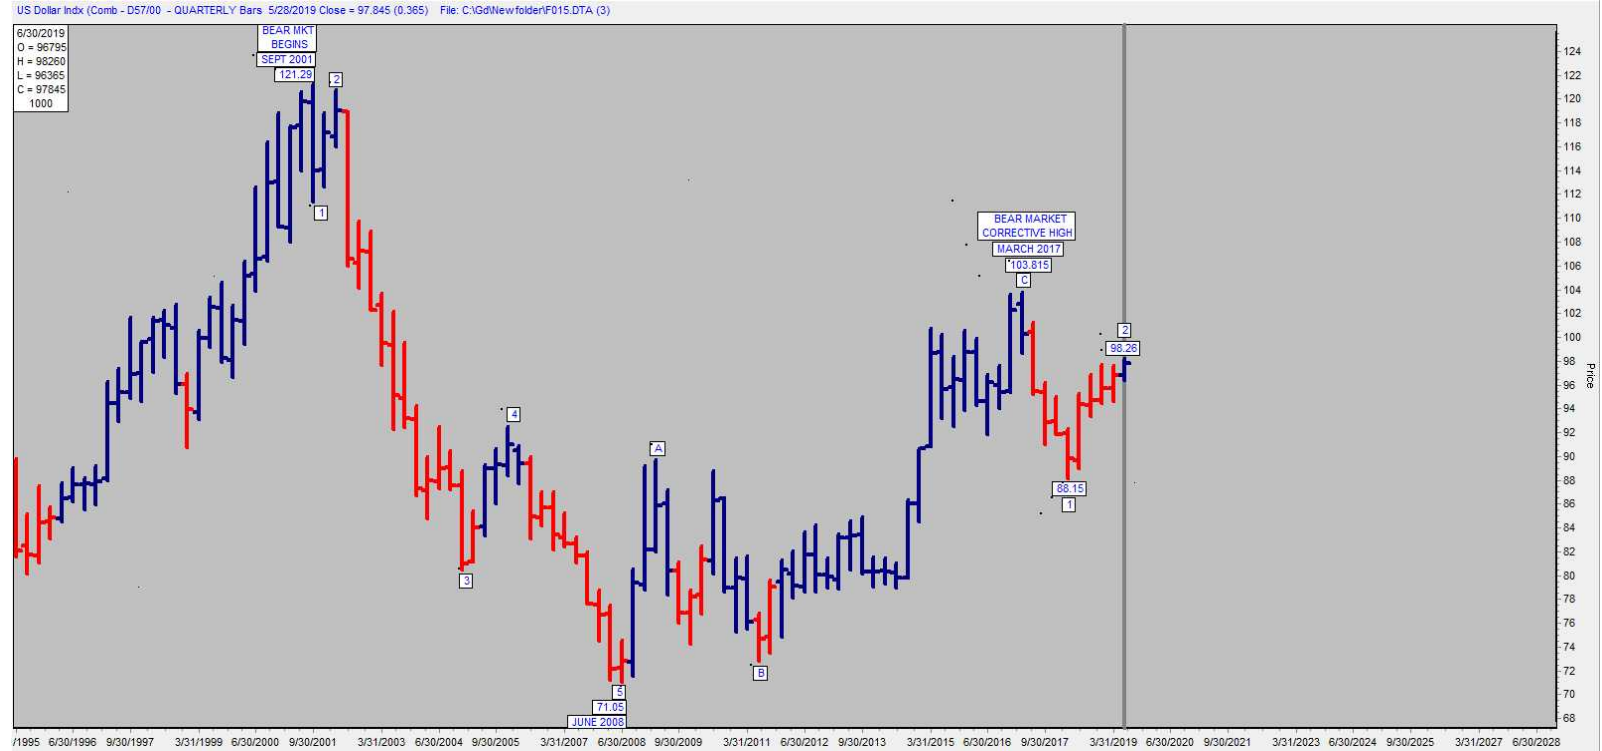

.....  
The volume during this Head and Shoulder’s pattern is unfolding as described in the above paragraph. Increasing volume during the decline of the right shoulder should confirm as fact that the Dollar Index will be collapsing.

### DOLLAR INDEX MONTHLY

As the Dollar Index resumes its downward path, it should become more than obvious that gold, silver and their shares are moving up dramatically.

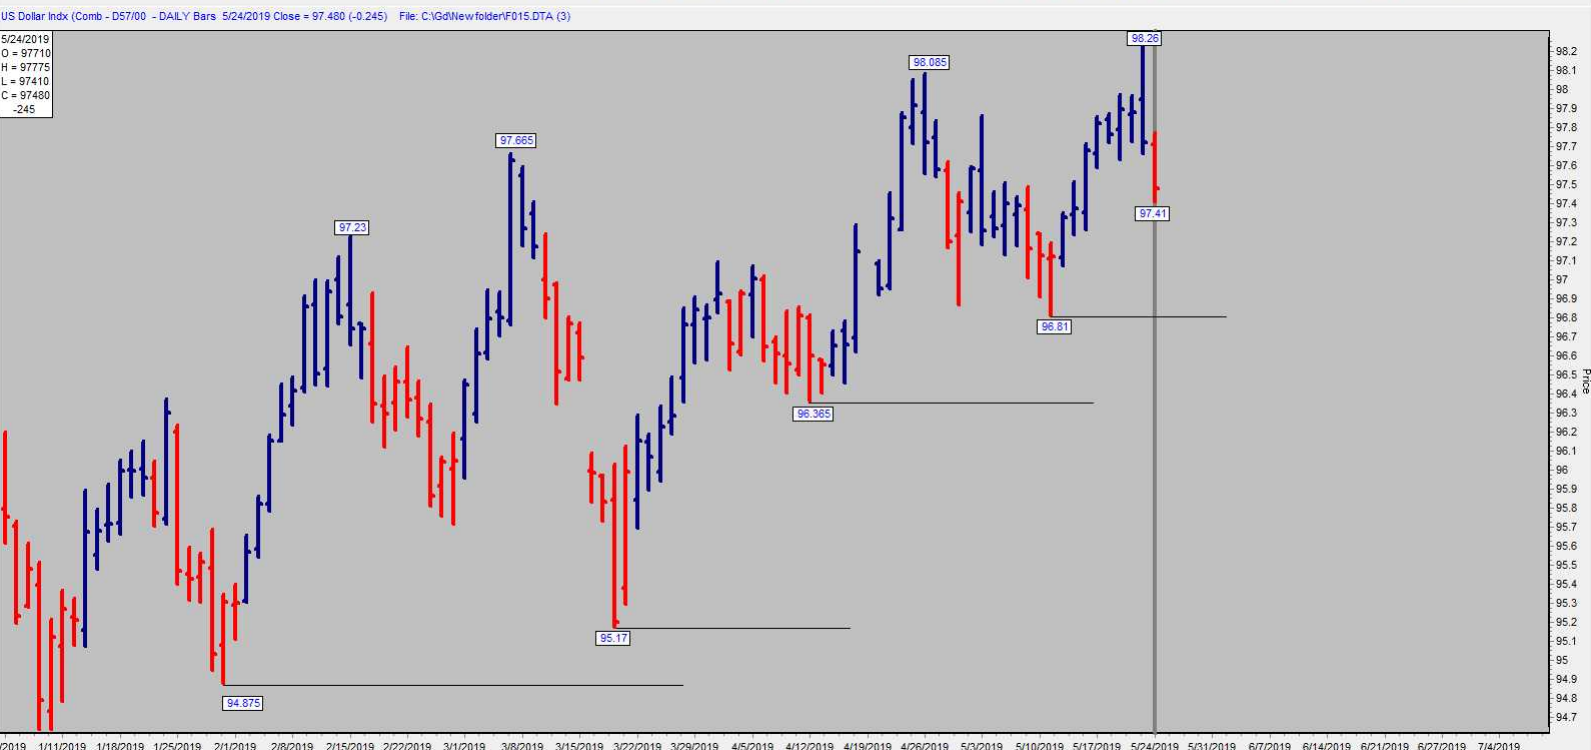

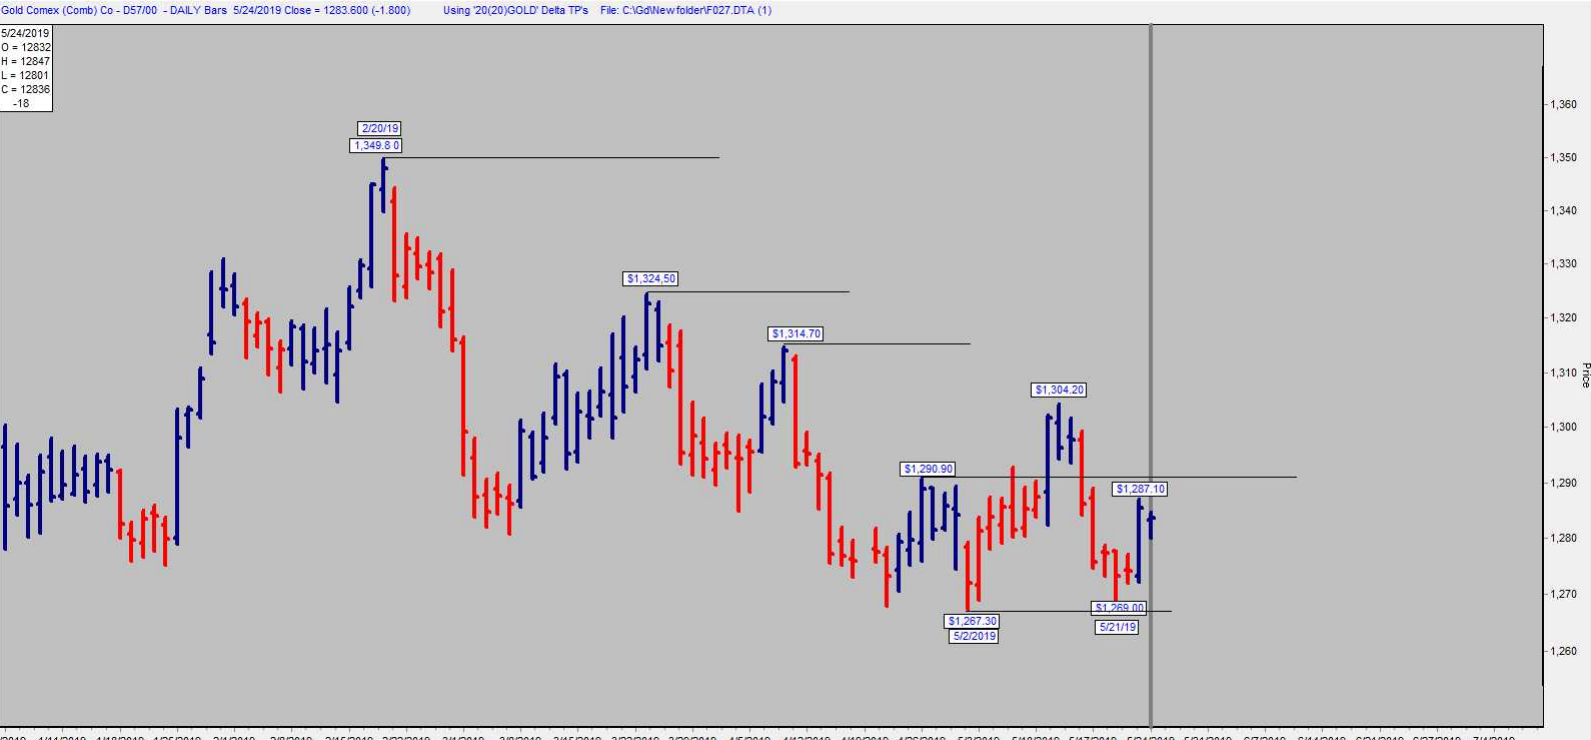

### DOLLAR INDEX QUARTERLY

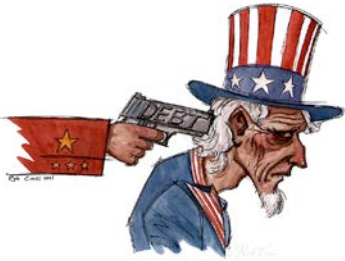

### GOLD QUARTERLY

**Gold closed above a previous high and bottomed above a previous low. This is an early indication that the tide has turned bearish for the dollar and bullish for gold and the rest of the precious metals complex.**
