## FREEDOM FROM FEAR

-----

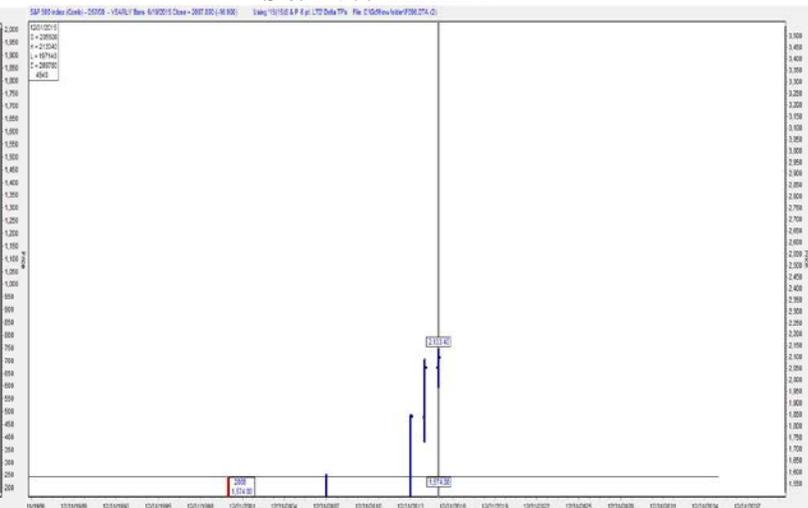

Since the year 2000 the road to profits and financial security for long term investors, beyond any possible doubt, has been the yellow brick road better known as gold bullion and its sometimes cranky little sister silver. Gold has increased almost 500% while the S & P 500 has increased approximately 33%. There should absolutely be no doubt whatsoever that the precious metals have far outperformed the S & P 500 and the DJIA. The charts in this July 4<sup>th</sup> presentation, regardless of anything you read or hear, irrefutably prove that gold is the place for long term investment funds!! There are so many negatives written about gold it is not possible to list them all here. Their purpose is to create fear in the investing public's mind to such an extent that they will not buy and hold gold. Since we know that we must, absolutely must, have a portion of our investment funds in gold and its cranky sister silver what could possibly prevent us from buying? *FEAR, FEAR, FEAR* is the answer to that question. How can we obtain *FREEDOM FROM FEAR*? The answer is simple: stand up tall, ignore all the negative B. S. and gather in a large portion of this ingredient;

**GOLD YEARLY**

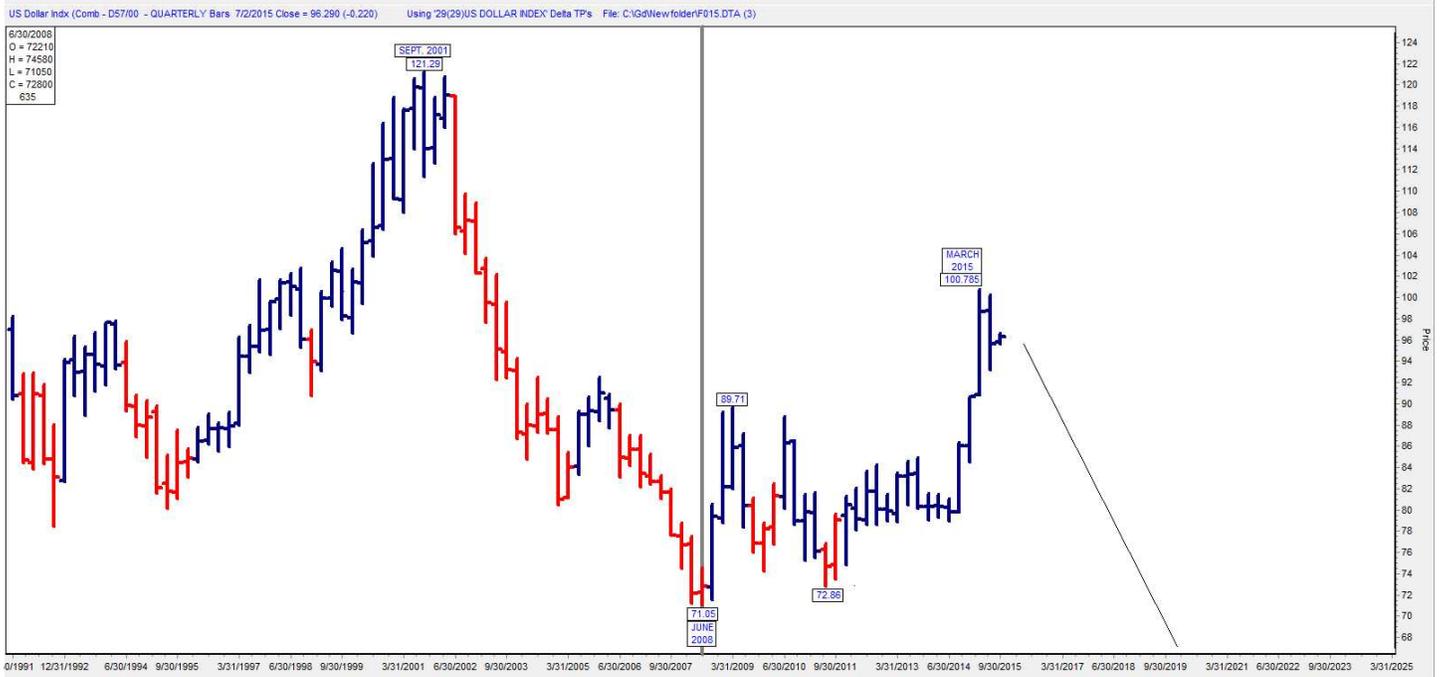

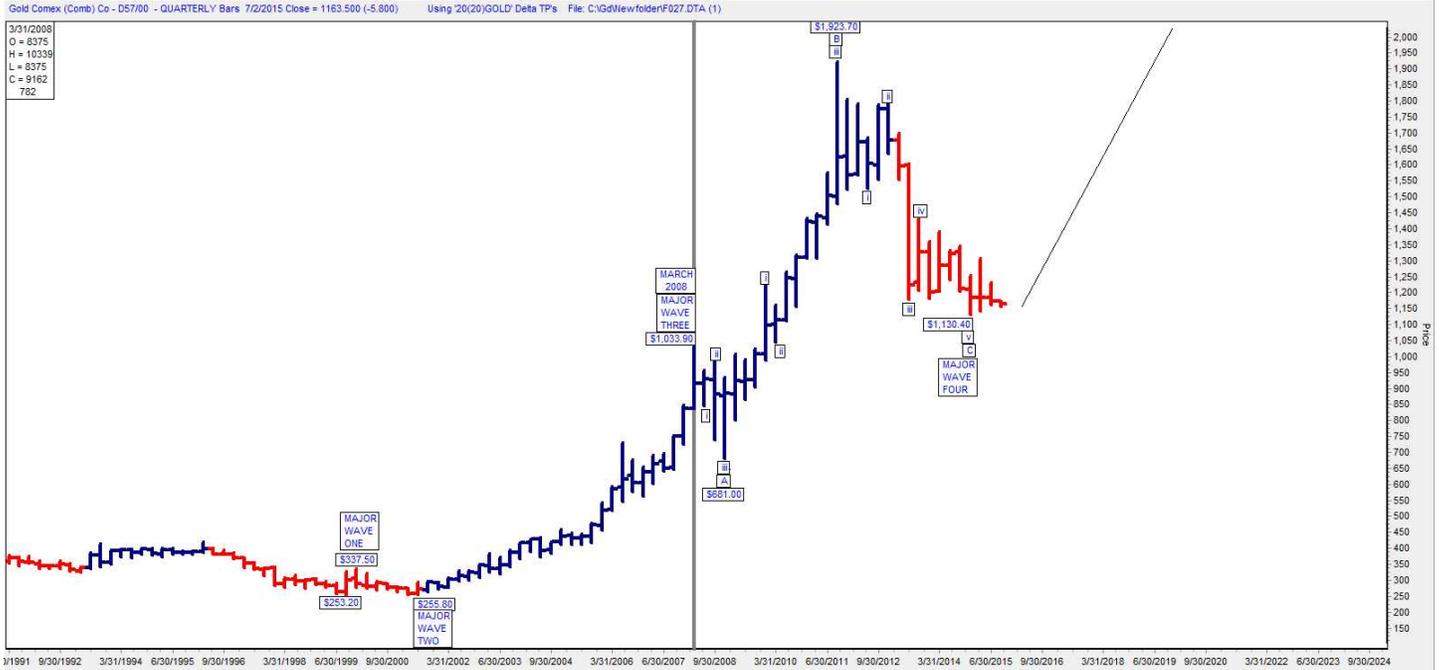

**S & P 500 YEARLY**

**It is impossible not to see that gold and the DOLLAR INDEX move in opposite directions. When one moves up the other moves down. When one corrects its up move the other corrects its down move.**

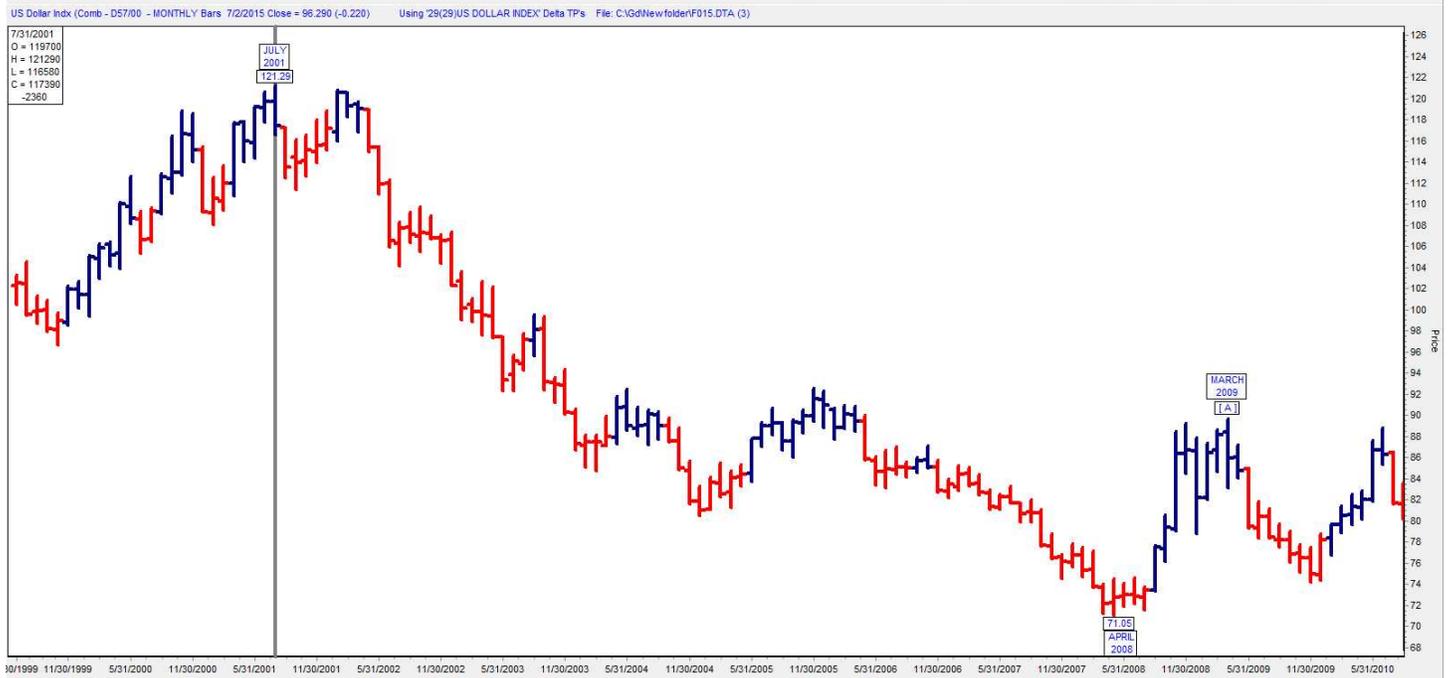

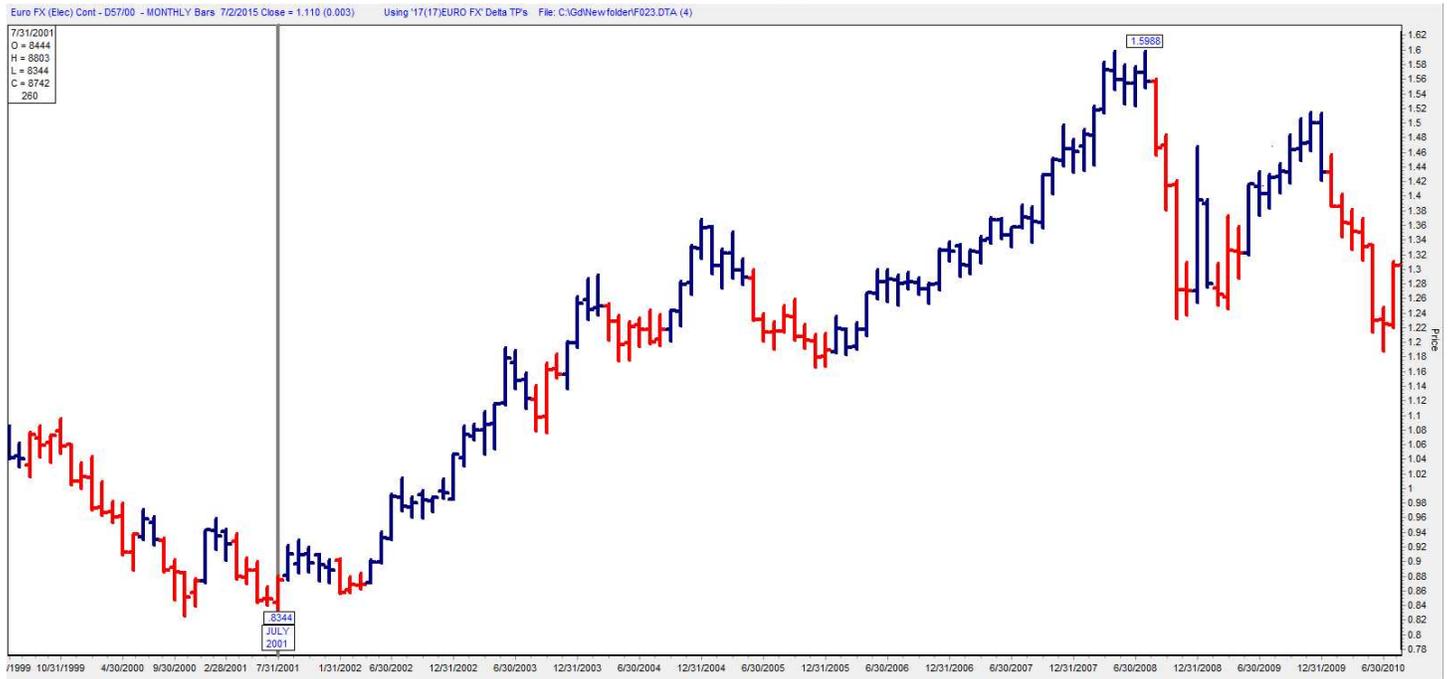

### GOLD QUARTERLY

### DOLLAR INDEX QUARTERLY

**In spite of all the fear mongering about Greece and the Euro countries being in difficult financial conditions it is obvious that the EURO FX has been rising while the DOLLAR INDEX has been collapsing. They began correcting those moves at the same time.**

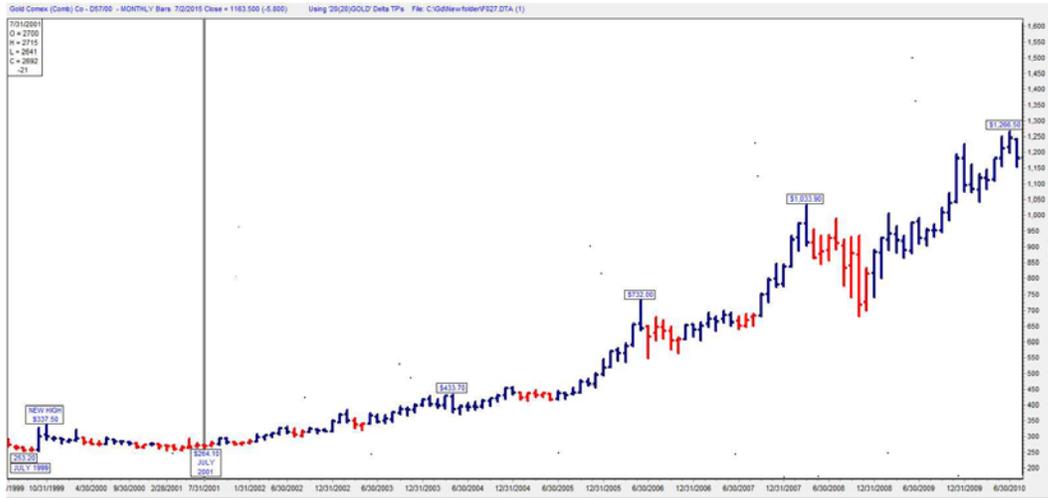

### EURO FX MONTHLY

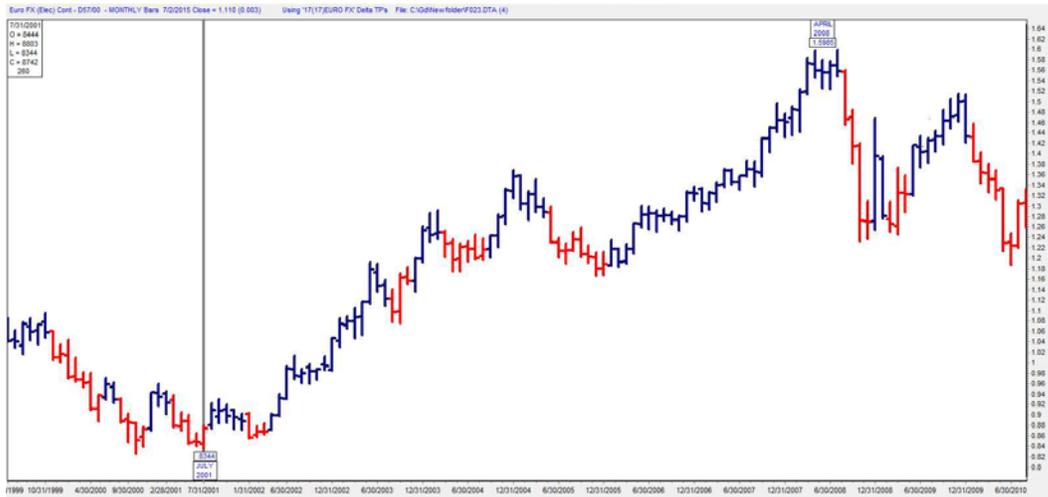

### DOLLAR INDEX MONTHLY

If we line up gold, the EURO FX, and the DOLLAR INDEX we clearly see that gold and the EURO FX are closely following each other on the way up while the DOLLAR INDEX is moving down.

**EURO FX MONTHLY**

**DOLLAR INDEX MONTHLY**

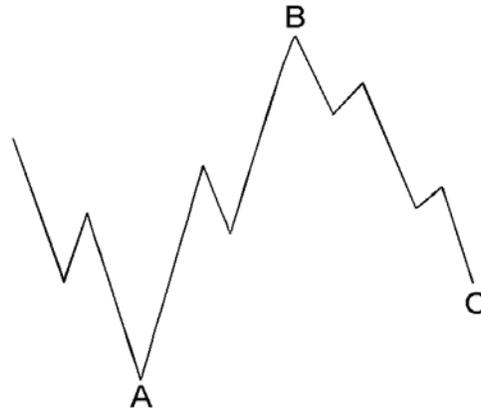

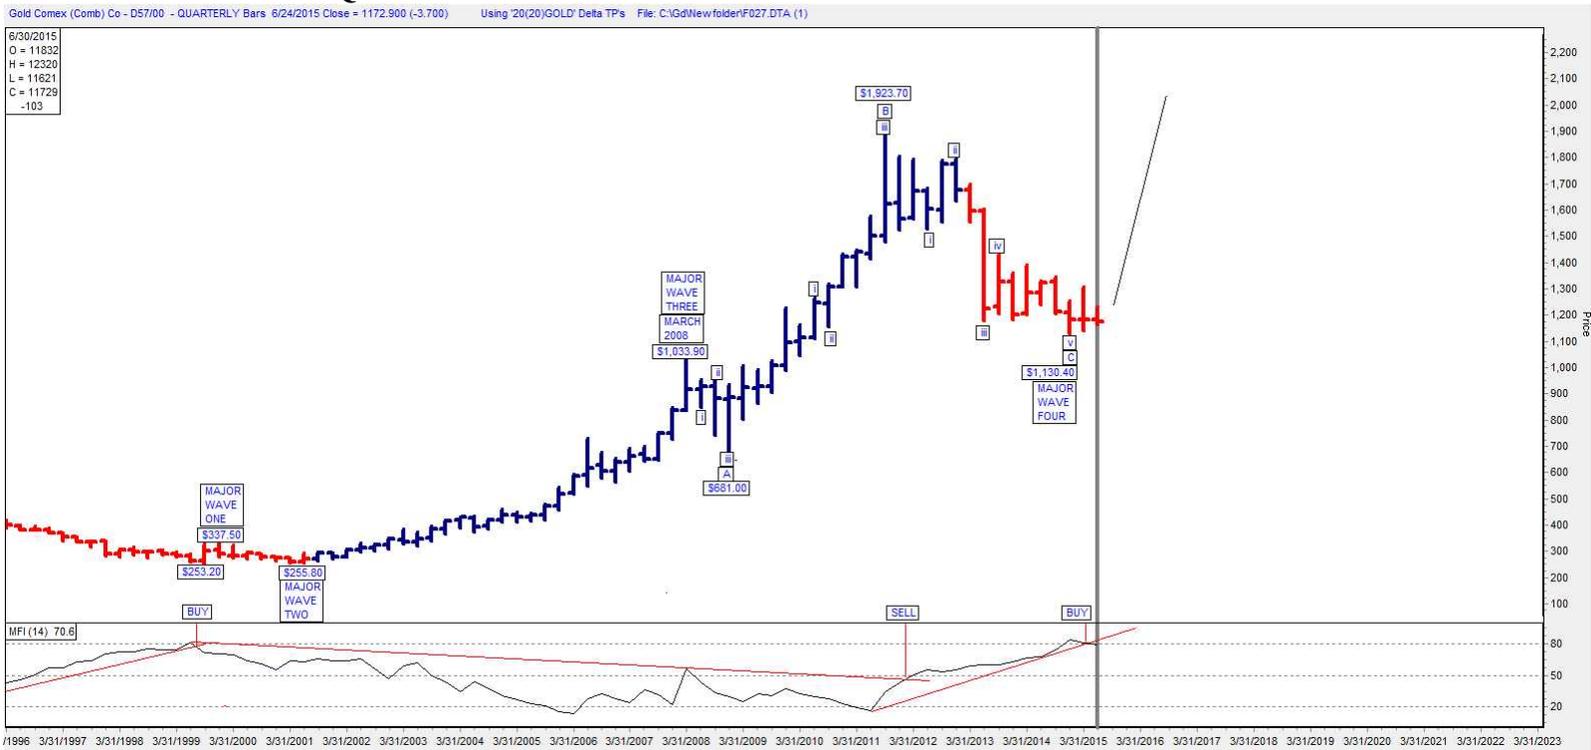

The corrections in the precious metals complex are just about complete. Yes, there may be slight lower lows but who the hell cares?? There is no way on the face of this earth that the just about to begin humongous rise in the precious metals complex can be papered over ... pun intended. The corrections in gold and silver are the rarest and most bullish type.

“The forces in the direction of the larger trend are *so powerful* that the pattern becomes skewed in that direction.” E. W. P.

### Running Flat Correction

### GOLD QUARTERLY

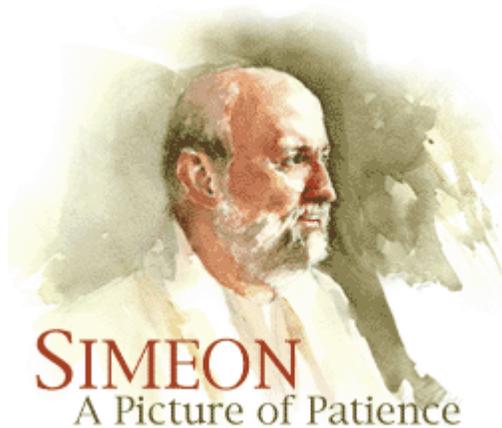

**On this 4<sup>th</sup> day of July 2015 the only thing left to do is thank the Lord for providing those brave souls who have kept our freedom alive.**
