RONALD L. ROSEN
July , 2016

REPORT

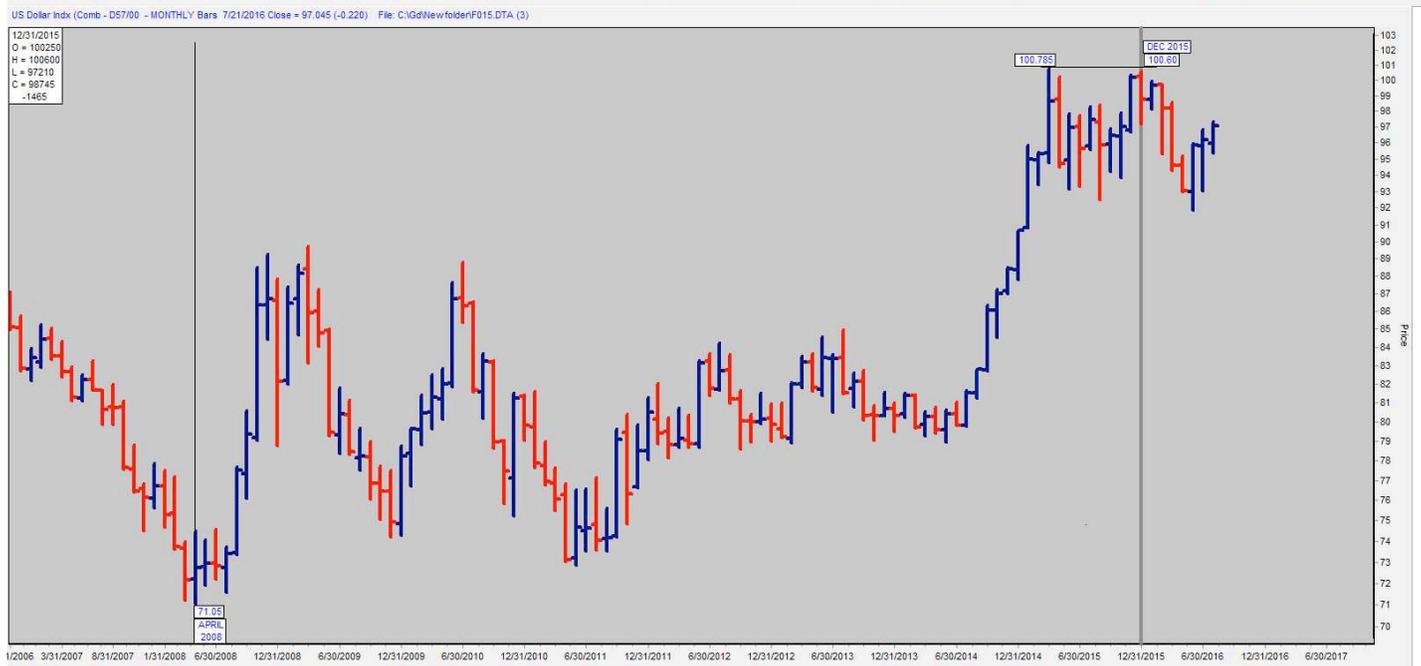

Corrections be dammed! Gold and silver are off and running in a monster bull move! It is as plain as the nose on our faces. The almost 8 year corrective pattern in both that proves this beyond doubt is called a *RUNNING FLAT CORRECTION*. This is what it looks like.

“The forces in the direction of the larger trend are so powerful that the pattern becomes skewed in that direction.”

When we line up the monthly gold chart with the Monthly Dollar Index chart we cannot miss the fact that the Running Flat Correction in gold began in March 2008. The bottom in the Dollar Index occurred one month later in April 2008. This fact is also impossible to miss. If we fast forward to the end of the charts we see that gold bottomed in December 2015. Lo and behold the Dollar Index also made a double top in the month of December 2015. From that moment forward I could not possibly ignore the fact that the bull market in gold resumed. At the same time it is obvious that the bear market in the Dollar Index also resumed in December 2015. C'est la vie. What more do we need? The answer to that question is patience in order to let the bull market in the precious metals complex unfold as it desires and not as we desire!!

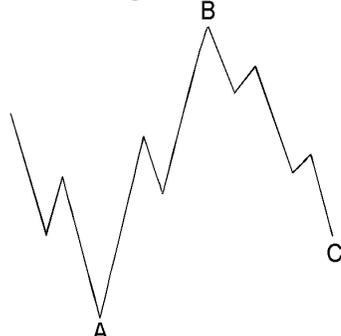

GOLD MONTHLY

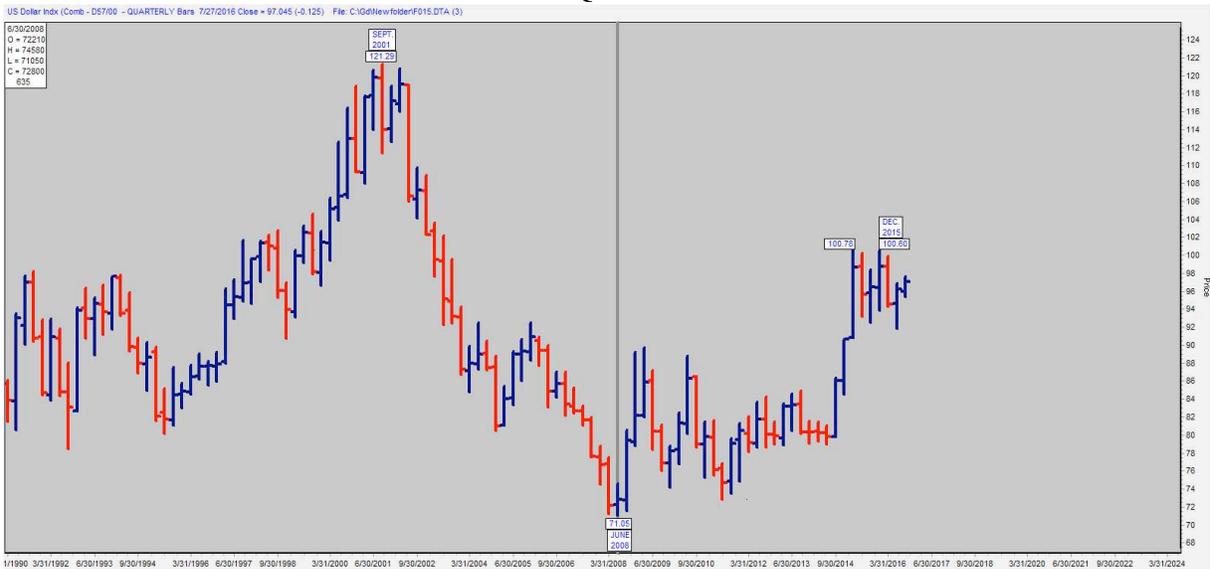

DOLLAR INDEX MONTHLY

“The forces in the direction of the larger trend are so powerful that the pattern becomes skewed in that direction.”

Running Flat Correction

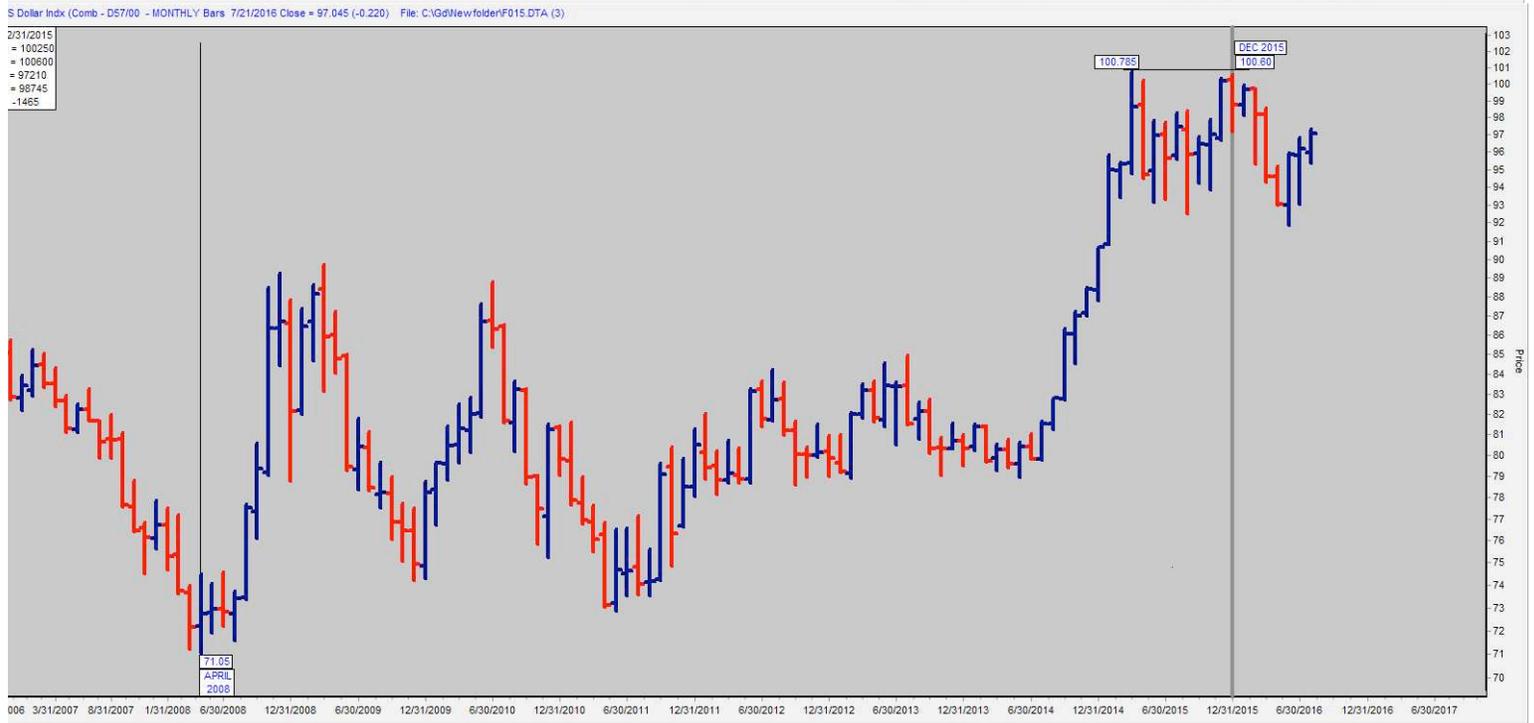

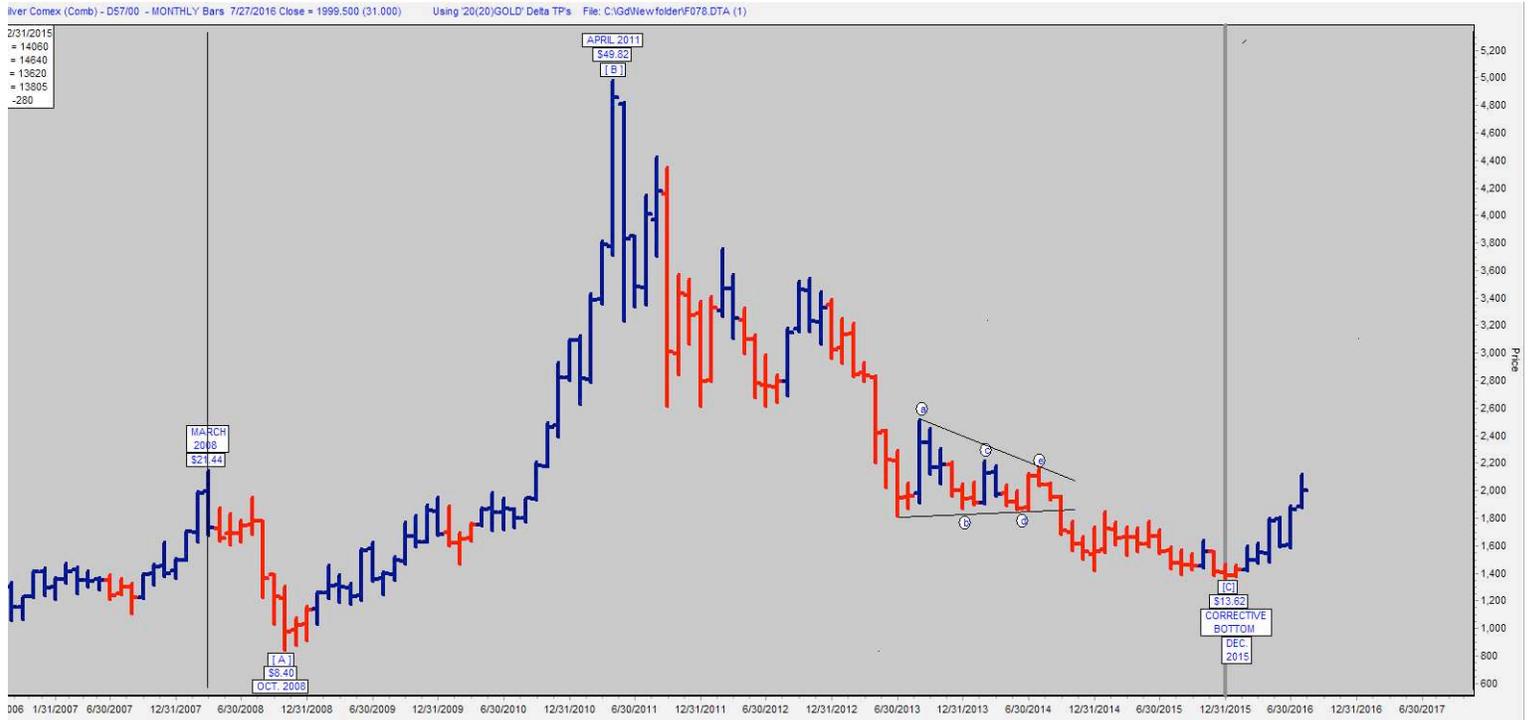

SILVER QUARTERLY

DOLLAR INDEX QUARTERLY

SILVER MONTHLY

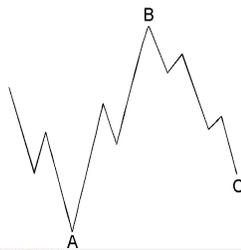

DOLLAR INDEX MONTHLY

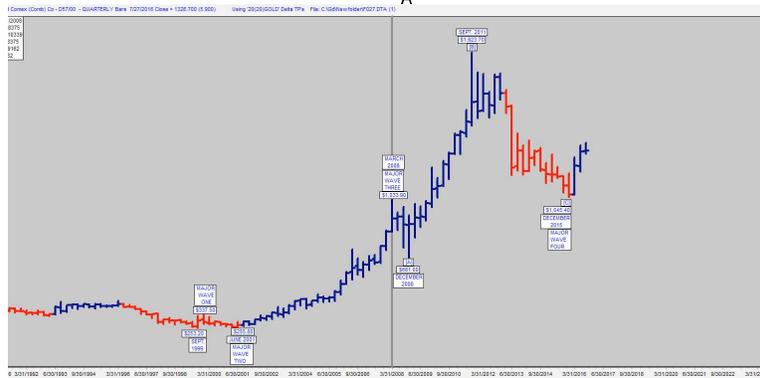

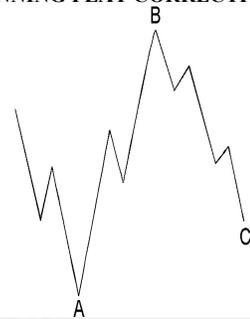

The Running Flat Correction in gold and silver supersedes all historical corrective measurements. It is telling us loud and clear that all corrections will be minor and short in time consumed. If you wait for typical big corrections to buy you will miss the boat.

“The forces in the direction of the larger trend are so powerful that the pattern becomes skewed in that direction.”
