August 8, 2018

REPORT

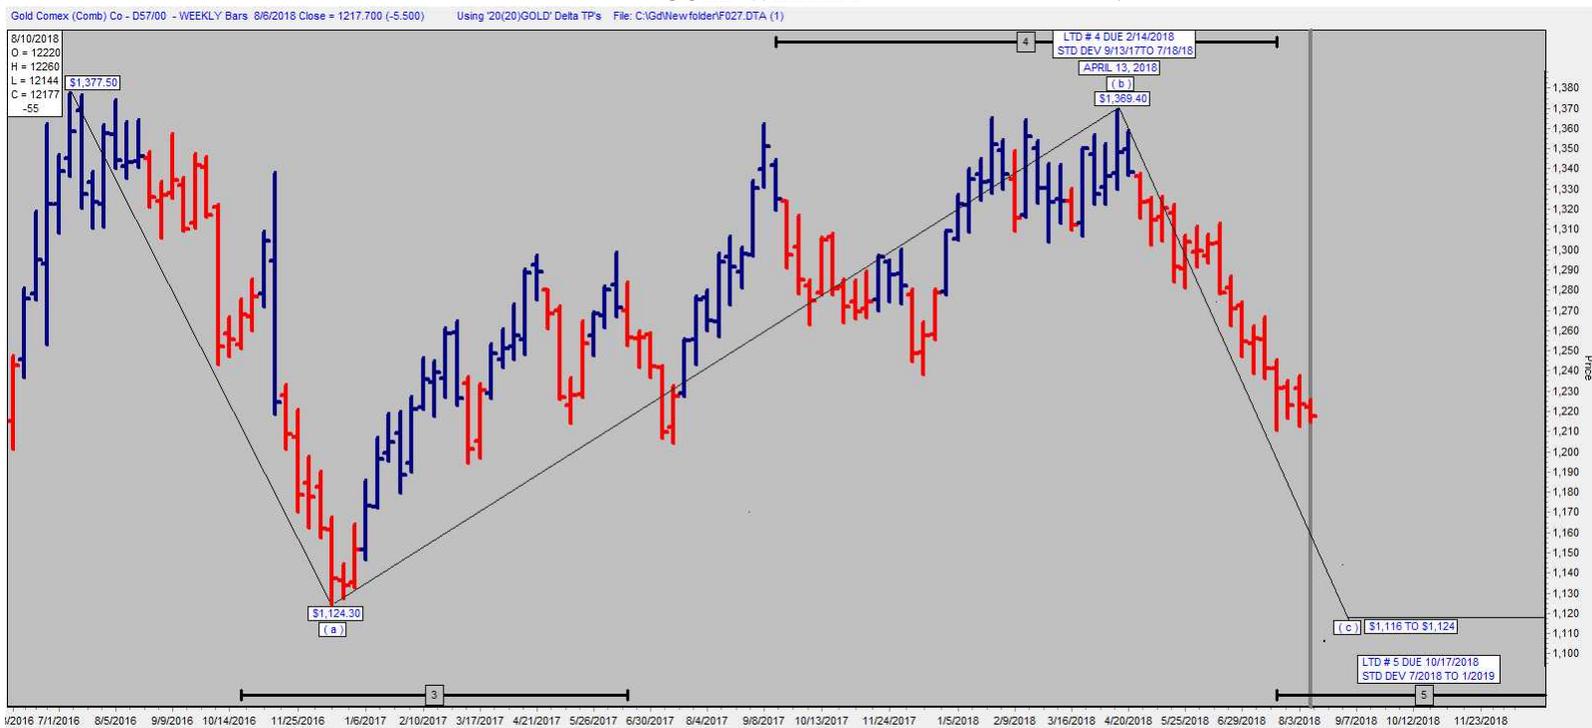

Gold has persistently declined since the top at Leg (b) in April 13, 2018. The price of gold is doing exactly what it should be doing if the pattern is an (a) (b) (c) Regular Flat Correction. That it is and Down She Goes.

Take Her Down

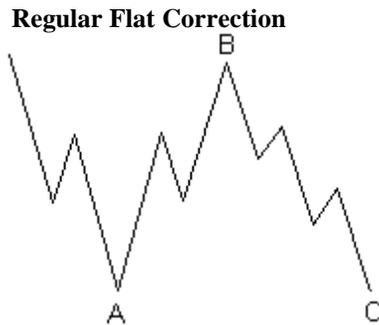

April 13, 2018
V

GOLD WEEKLY

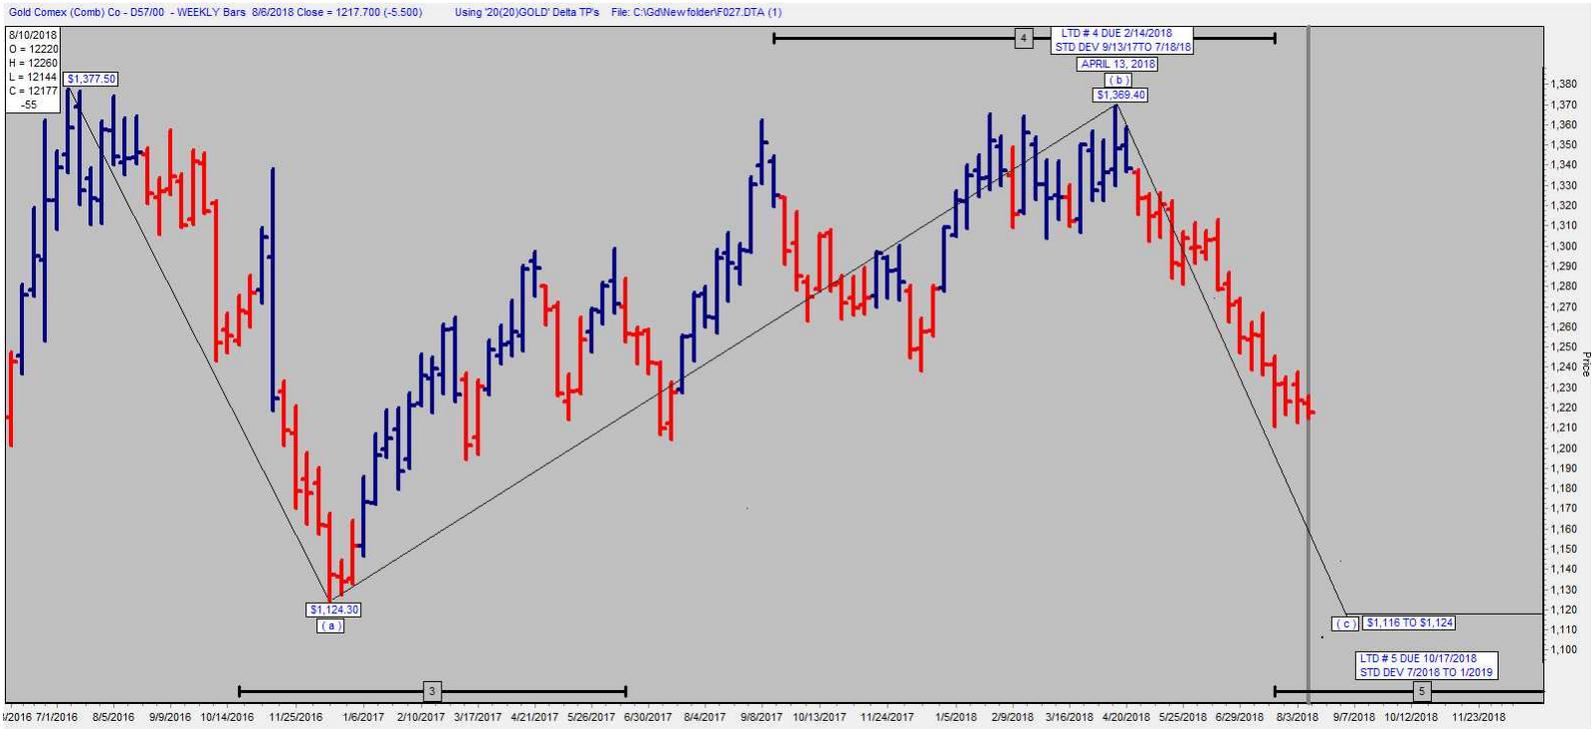

“In a *regular flat correction*, wave B terminates about at the level of the beginning of wave A, and wave C terminates a slight bit past the end of wave A.” E. W. P.

The move up in gold peaked at \$1,377.50. Leg (a) down bottomed at \$1,124.50. Leg (b) up topped at \$1,369.40. This was just beneath the beginning of Leg (a) down. This conformed to the definition of a Regular Flat Correction. Leg (c) down began in the week of April 13, 2018. If leg (c) down continues to perform as it should in a Regular Flat Correction we should see a low in gold “ ... a slight bit past the end of wave A.” Since Leg (a) bottomed at \$1,124.50 the bottom in this correction should occur just beneath \$1,124.50. There should be another \$80.00 to \$100.00 decline in the price of gold.

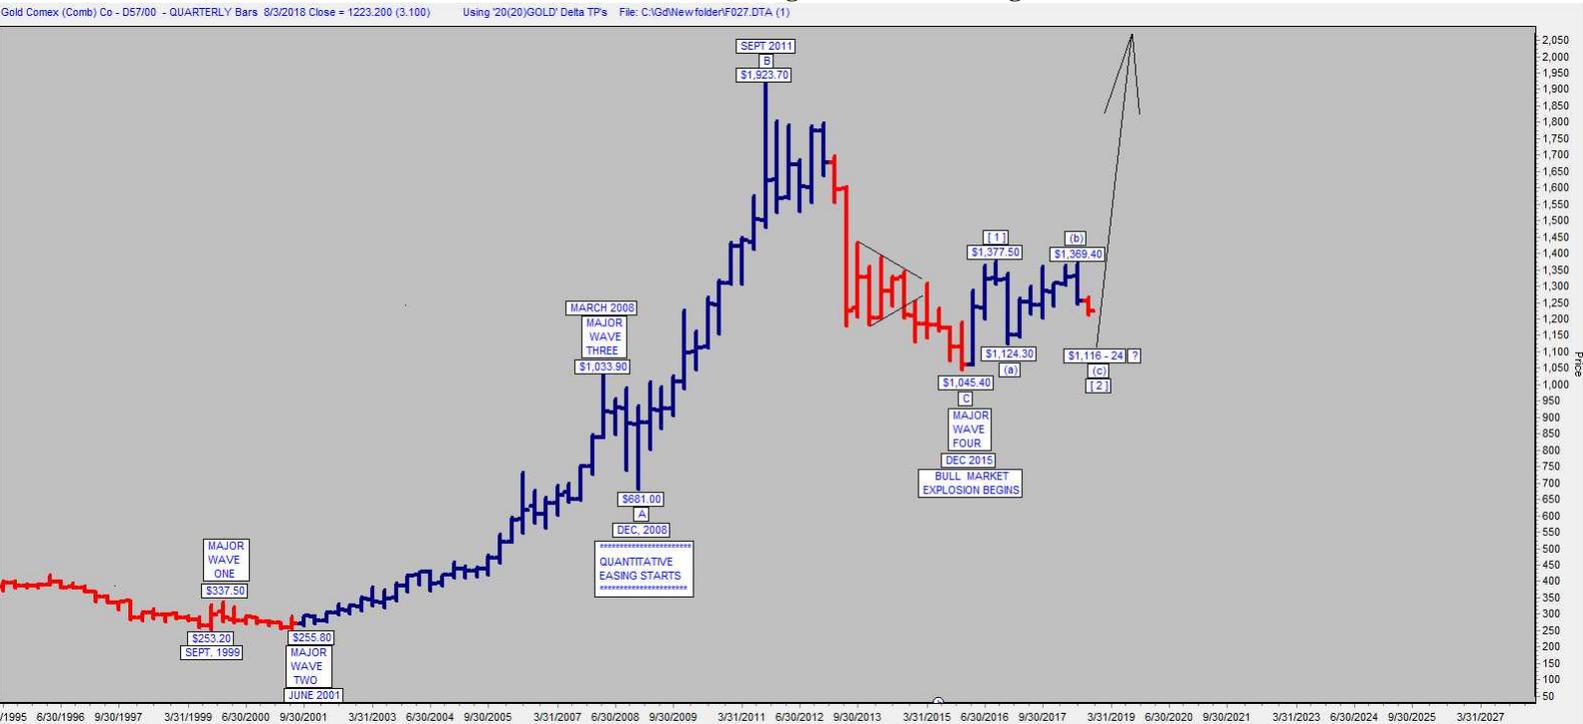

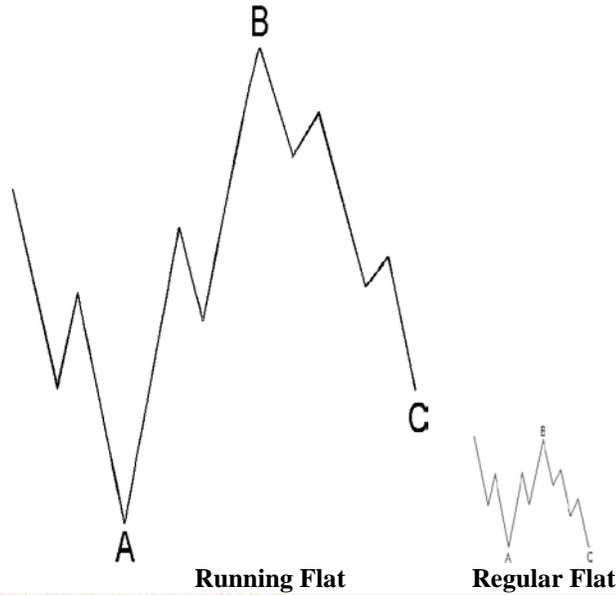

GOLD WEEKLY

Reville

A monumental explosion in the price of gold has been building since the advent of Quantitative Easing.

“The forces in the direction of the larger trend are so powerful that the pattern becomes skewed in that direction.” E. W. P.

GOLD QUARTERLY

Once the price of gold bottoms slightly below \$1,124.50 a bullish explosion in price will begin. It will painfully remind all of us of a well-known very old story.

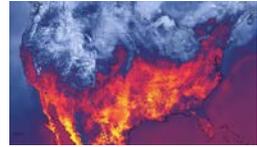

Ace in the Hole

"You can fool all the people some of the time, and some of the people all the time, but you cannot fool all the people all the time."

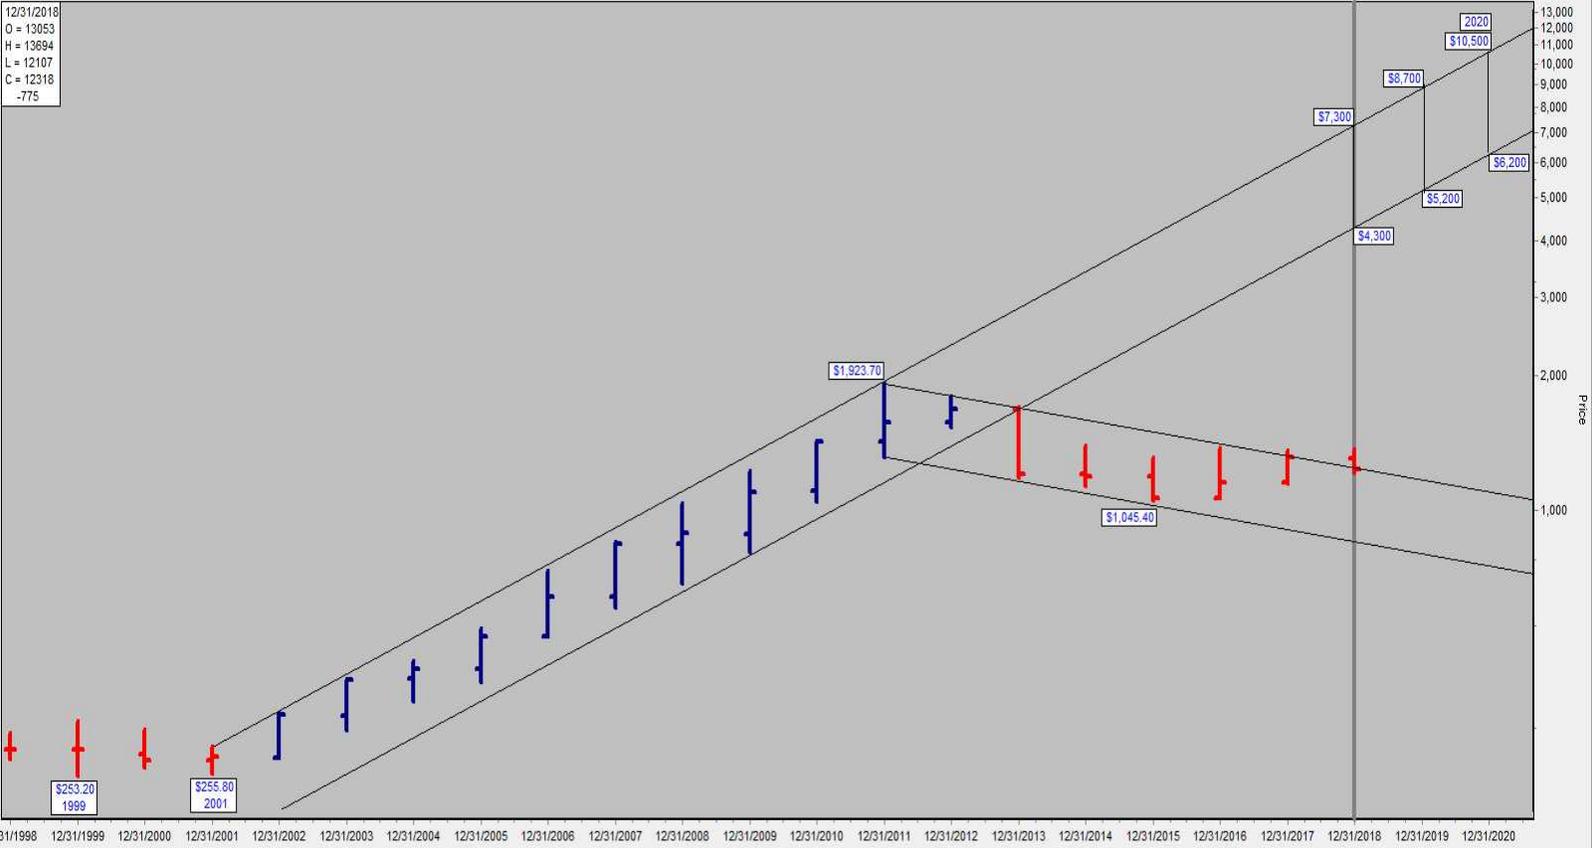

Abraham Lincoln

The Lord's Prayer.
