UPDATE

[Hail To The Chief](#)

https://en.wikipedia.org/wiki/Donald_Trump_presidential_campaign,_2016

“The 2016 presidential campaign of Donald Trump, an American businessman, television personality, and author, *was formally launched on June 16, 2015, at Trump Tower in New York City. Trump was the Republican nominee for President of the United States in the 2016 election, having won the most state primaries, caucuses, and delegates at the 2016 Republican National Convention. He chose Mike Pence, the sitting Governor of Indiana, as his vice presidential running mate. On November 8, 2016, Trump and Pence were elected president and vice president of the United States.*”

- =====
1. ***...was formally launched on June 16, 2015,***
 2. ***... On November 8, 2016, Trump and Pence were elected president and vice president of the United States.”***

The Dow Jones Industrial Average may soon begin a monumental collapse.

.....
***A Dow Theory Non-Confirmation* of a continuing decline occurred in the week of January 20, 2016. The Dow Jones Industrial Average had bottomed at 15,450.60 on that date. Since that date the Dow Jones Industrial Average has risen to a high of 22,179.11. That was an increase of 6,728.51 points in approximately 20 months.**

***A Dow Theory Non-Confirmation* of a continuing rise occurred in the week of July 21, 2017. At that time the Dow Industrials made a new all-time high but the Dow Transports failed to make a new all-time high. Since July 21, 2017 the Stock Market has been living with a very important Dow Theory Non Confirmation of a continuing rise.**

The reason that the current Dow Theory Non-Confirmation of a continuing rise is of extreme importance is because this Dow Theory Non-Confirmation of a continuing rise has been accompanied by a huge increase in volume.

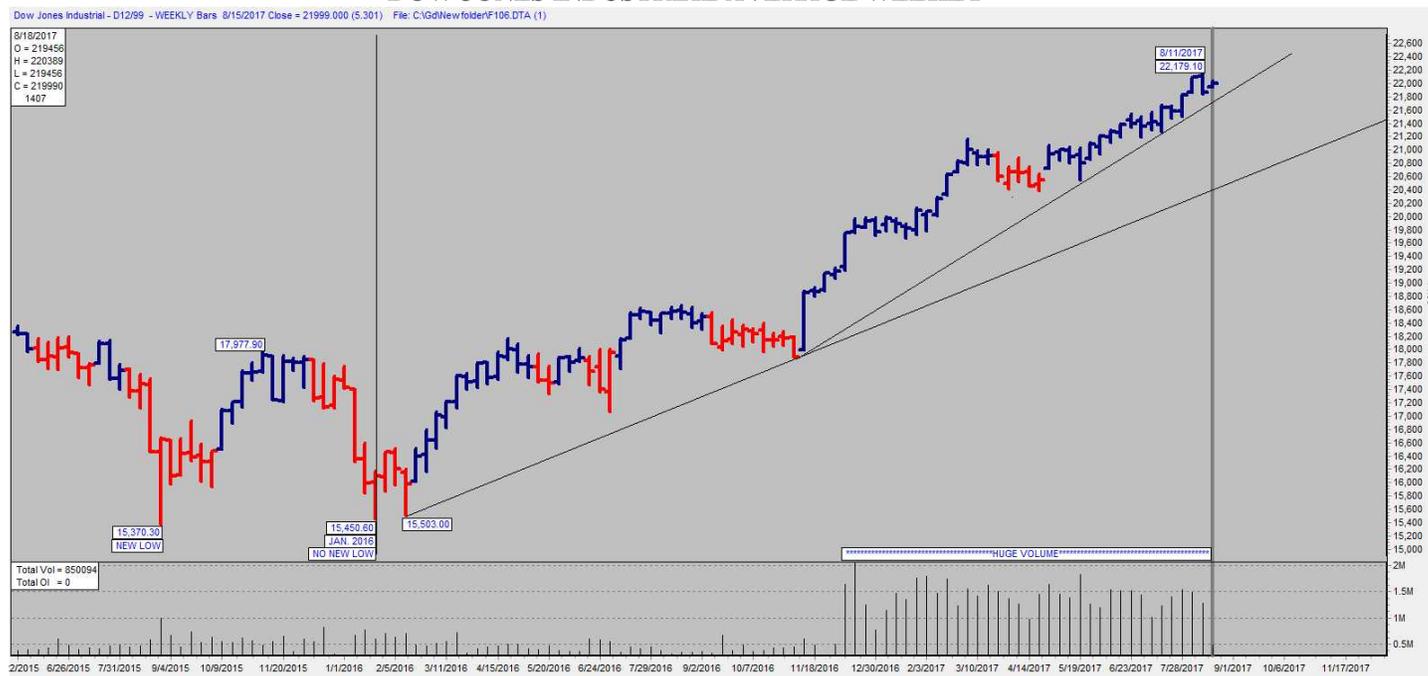

Dow Theory: Volume Must Confirm The Trend

<http://www.investopedia.com/university/dowtheory/#ixzz4pjsvsHix>

The Dow Industrials did not confirm the new low in the Dow Transports in *January 2016*. That Non-Confirmation of continuing lows took place on moderate volume. From that point forward the Averages have been on a rampaging rise to new all-time highs with one exception. That exception is taking place now in August 2017. The Dow Industrials made a new all-time high last week but the Dow Transports are more than 400 points from confirming the new high in the Dow Industrials. Of great significance is the fact that this non-confirmation is taking place on *huge volume*.

*** [Dow Theory: Volume Must Confirm The Trend](#) ***

DOW JONES INDUSTRIAL AVERAGE WEEKLY

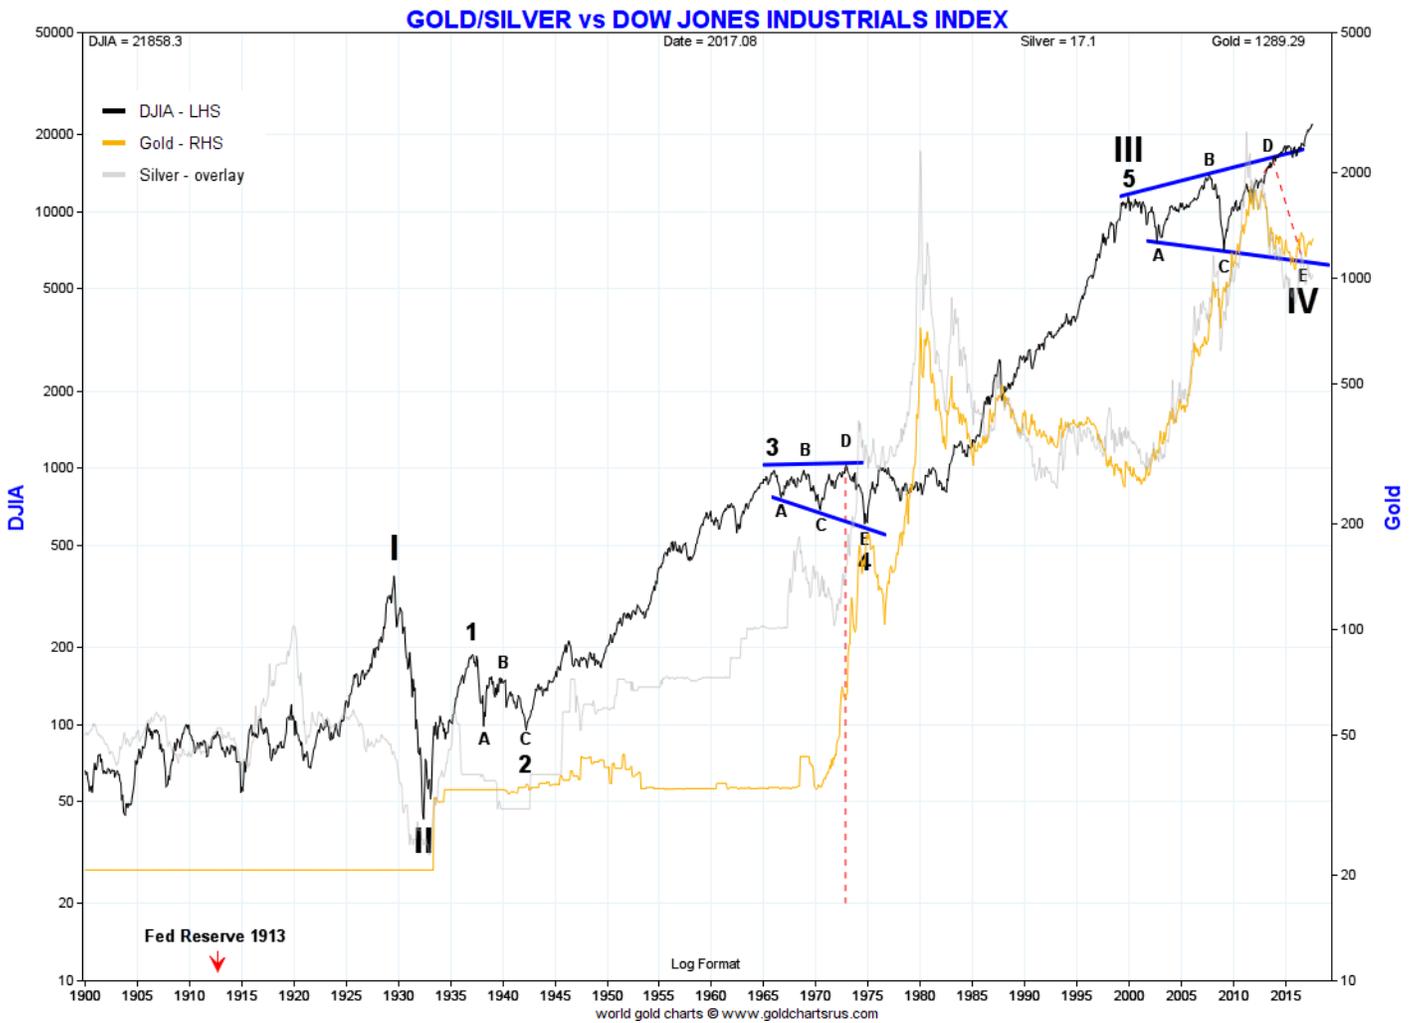

DOW JONES TRANSPORTATION AVERAGE WEEKLY

A Dow Theory Non-Confirmation of continuing highs in the Dow Jones Industrial Average has taken place at what may turn out to be the High of Leg D of Major Wave IV. If this does turn out to be the High of Leg D of Major Wave IV a collapse to the lower trend line of the Megaphone Pattern of Major Wave IV will truly be a disaster. Quantitative Easing began at approximately the bottom of Leg C of Major Wave IV. Quantitative Easing has caused many investors and Wall Street inhabitants to believe strongly in [The Grand Old Flag](#).

If the current Dow Theory Non-Confirmation of new highs remains in force and leads to a market collapse we can rest assured that this will be appropriate [Taps](#).
