<http://www.shmoop.com/shakespeare-quotes/what-fools-these-mortals-be/meaning-now.html>

“What fools these mortals be”

What do we mean when we say it today?

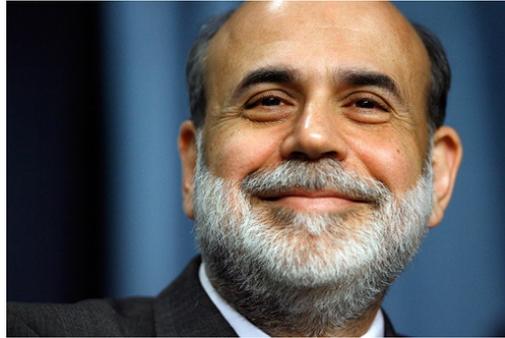

“Shakespeare's play suggests that we are all fickle and irrational creatures when it comes to love. But what about today? Are we still as cray-cray when it comes to finding and pursuing love?

We'll admit it. We've totally been there. Acting insane for someone just kind of comes with the whole teenager thing. It's a package deal. So is Puck right? Are we all fools? You decide.

This phrase is said nowadays when talking about more than just love. Sure, love makes us foolish, but so do other things, too. People say this in just about any setting where we're not using our heads properly.”

“What fools these mortals be”

“ ... where we're not using our heads properly.”

The 21 Most Successful MIT Alumni Of All Time

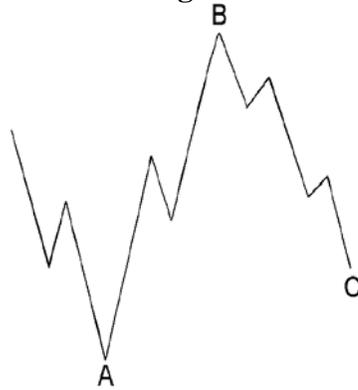

Former chairman of the Federal Reserve Ben Bernanke earned his Ph.D. in economics at MIT in 1979. He wrote a dissertation entitled, "Long-term Commitments, Dynamic Optimization, and the Business Cycle."

The highly educated and credentialed Mortal Fools on page 2 have absolutely no knowledge or awareness of the fact that they have created a monster bull market in gold and silver. The tool they used in order to create this monster bull market is called Quantitative Easing. It is impossible to miss the exact time that their creation gave birth to this extremely rare and hugely bullish correction. This magnificently bullish correction is called a *Running Flat Correction*.

“The forces in the direction of the larger trend are so powerful that the pattern becomes skewed in that direction.” E. W. P.

Running Flat Correction

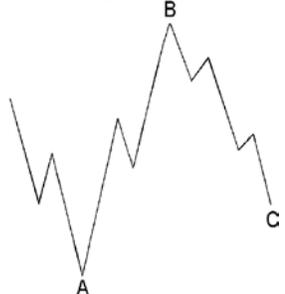

GOLD QUARTERLY

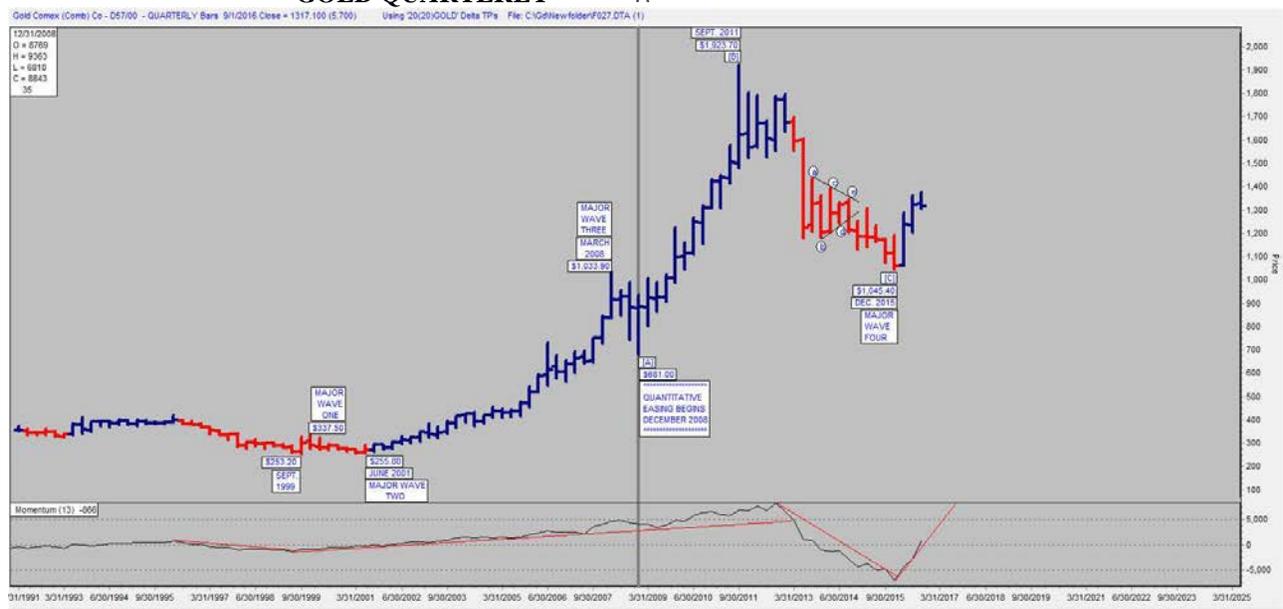

Maybe it takes an old timer (pun intended 85 years old to be exact) like me to put the proper long term charts together in order to really see what is happening in the markets. However, if the truth be known it's not difficult. The necessary charts and their progress have been staring us in the face since December 2008. The momentum indicator is another obvious clue as to future direction.

Running Flat Correction

GOLD QUARTERLY

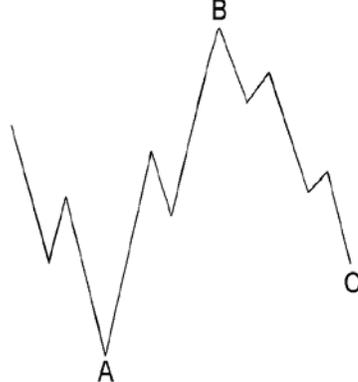

DOW JONES INDUSTRIAL AVERAGE QUARTERLY

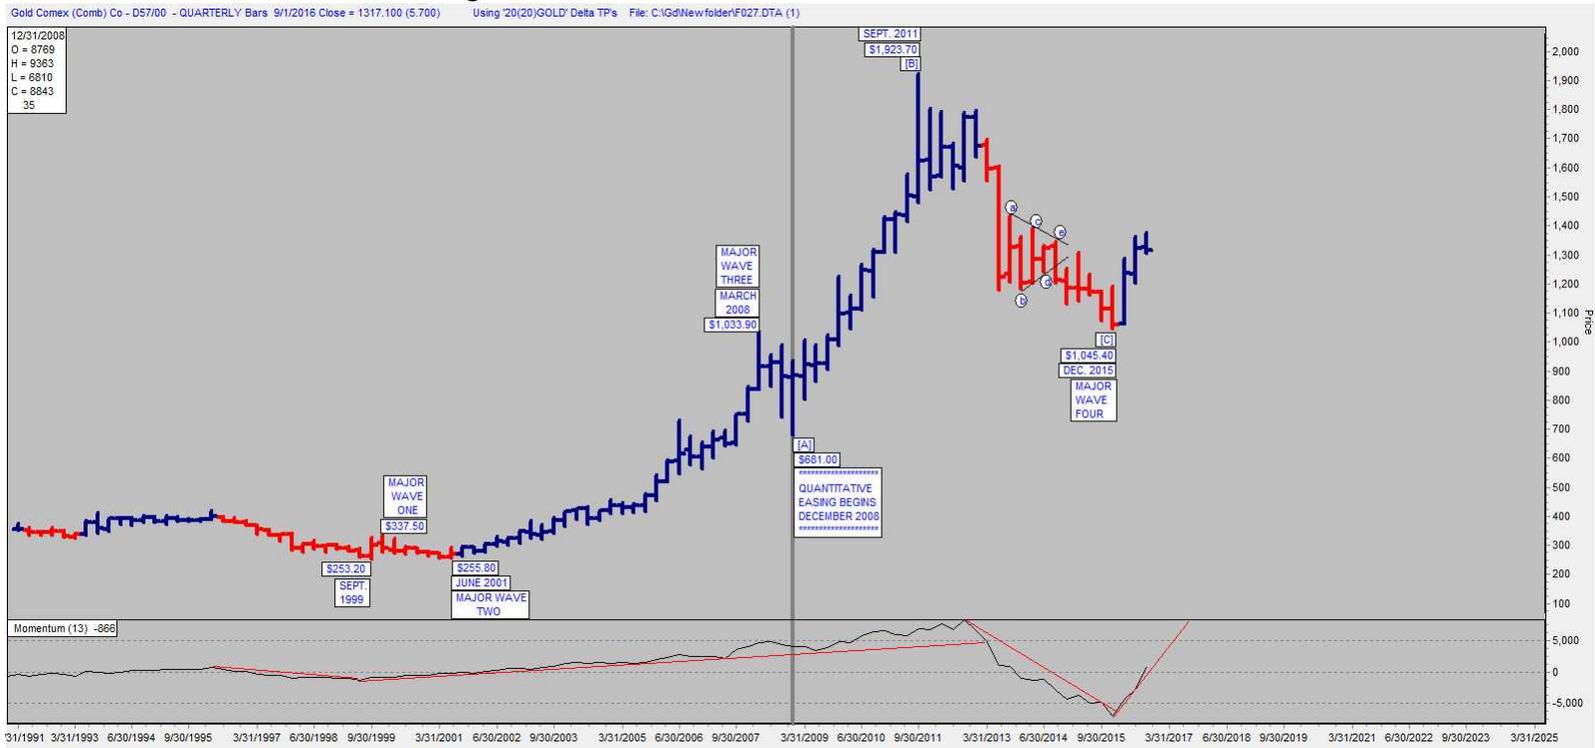

The extreme bullish power of the Running Flat correction is telling us “Loud and Clear” that starting from the bottom of the Running Flat Correction in gold and silver all future corrections will be small, modest, and mild.

“The forces in the direction of the larger trend are so powerful that the pattern becomes skewed in that direction.” E. W. P.

Running Flat Correction

GOLD QUARTERLY

“The forces in the direction of the larger trend are so powerful that the pattern becomes skewed in that direction.” E. W. P.

Running Flat Correction

SILVER QUARTERLY

The Dow Theory Non-Confirmation is intact.

DOW JONES INDUSTRIAL AVERAGE QUARTERLY

DOW JONES TRANSPORTATION AVERAGE QUARTERLY
