

**This monthly gold chart shows that the next LTD # 4 high is due in February 2018. Since every LTD # 4 high has been higher than the previous LTD # 4 high, gold should be higher than \$1,434.00 by February 2018. Will gold be higher than \$1,434.00 by February 2018? The odds makers in Las Vegas would love the odds on this bet. So do I. If we follow Mother Nature we will usually do quite well. If we ignore her for any reason or reasons whatsoever, we will usually suffer the consequences of doing so.**

### GOLD MONTHLY # 2

Just like gold every SILVER (LTD) Long Term Delta # 4 high has been higher than the previous LTD # 4 high.

### SILVER MONTHLY # 1

**If the next LTD # 4 high is higher than the previous LTD # 4 high silver will be above the price of \$25.12 by February 2018. I can picture the Odds Makers in Vegas smiling.**

### SILVER MONTHLY # 2

The numbers in the circles are called Delta Medium Term turning points (MTD). I have placed circles with the number of each MTD right on the chart. This shows you how accurately predictive these MTD turning points are. Mother Nature does not deceive us.
