FUSE

One of the benefits of attending and graduating from the Naval Aviation Ordinance School in Jacksonville, Florida is the fact that I was taught that a huge bomb must travel a certain distance before the fuse is armed. That little propeller in front of the fuse rotates a small disc inside the bomb. That disc has a small hole that becomes lined up with the firing pin. In other words a monumental explosion will not take place unless a specific and exact distance is travelled by the bomb. Once that distance is traversed when the bomb hits the target the explosion takes place!

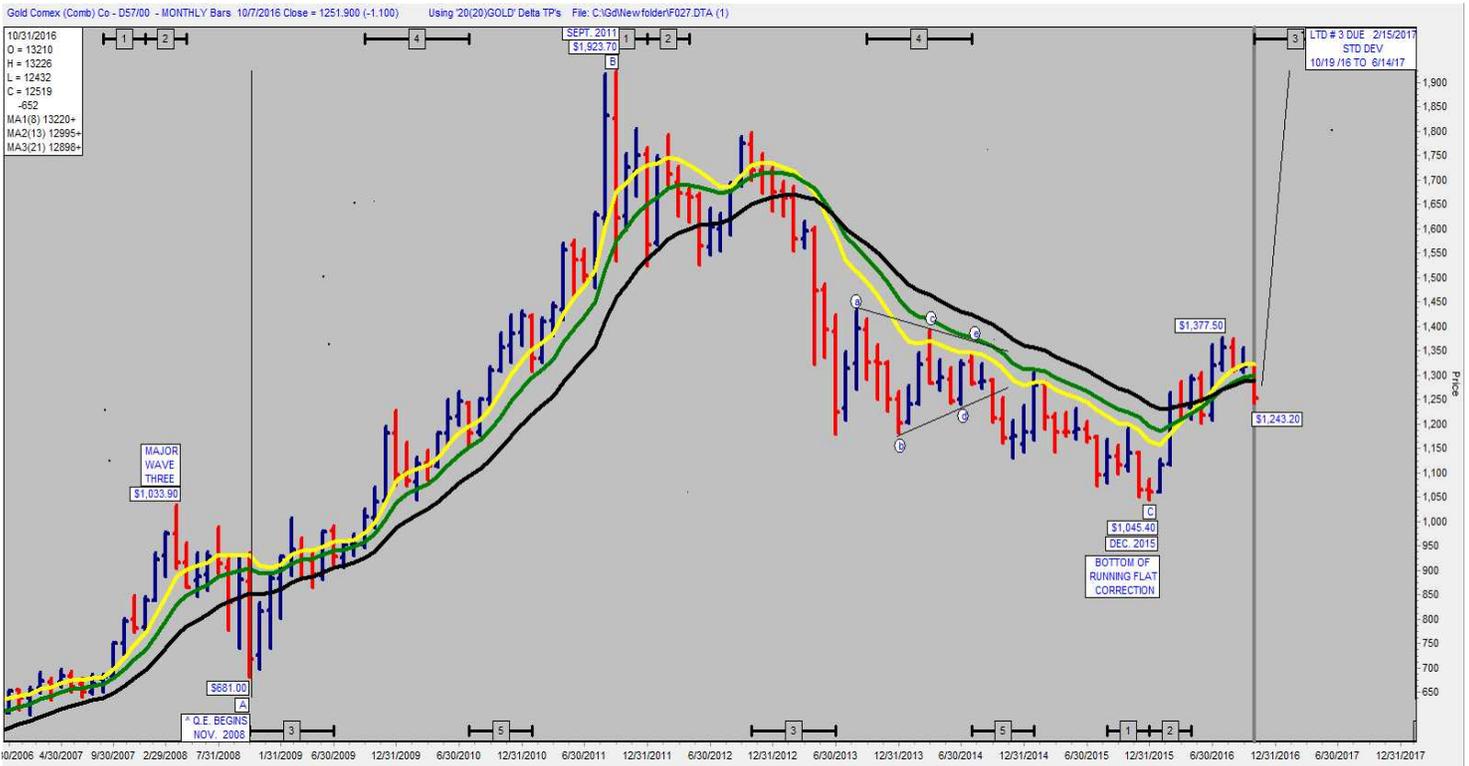

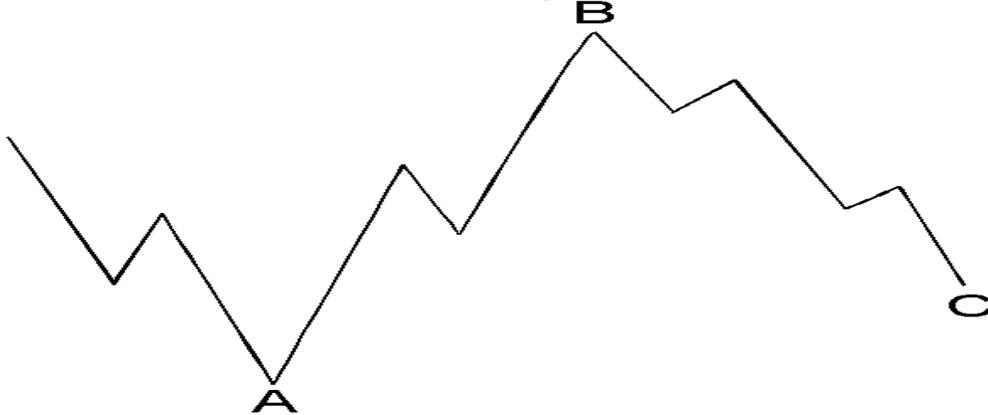

I have written this before and I will write it again, “It is beyond belief that there is not another so called market analyst or market timer that is aware of the following fact.”

Gold has travelled the necessary distance. The fuse is armed. The explosion is about to take place.

The Fuse in the form of Quantitative Easing was inserted in the bomb during the month of November 2008. The distance travelled necessary to arm the fuse was achieved in December 2015. Dear Subscribers the EXPLOSION IS UNDERWAY!

“The forces in the direction of the larger trend are so powerful that the pattern becomes skewed in that direction.” E. W. P.

GOLD MONTHLY

Quantitative Easing better known as “The Fuse” was inserted in the DJIA and the S & P 500 bombs at the same time that it was inserted in the gold and silver bombs! The explosion will be MONUMENTAL, HUMONGOUS, and HORRENDOUS! This is so obvious that the only thing that may be equally as MONUMENTAL is the fact that not a single market analyst, other than your Cap’n, be they government or private, be they highly educated or otherwise has identified this amazingly obvious, obvious, obvious fact of market life staring us in the face. Ahhh ... that’s it ... the face ... that word the face... reminds me that they don’t know their ass from their elbow!! What else could it be? This is too obvious for me not to ridicule those analysts that cannot see it. Is this a prediction of mine? No, I do not make predictions! I only make projections based on facts that even an 85 year old former U. S. Navy Aviation Ordnance man Petty Officer 3rd Class can see staring him in the face.
