### REPORT

<http://www.elliottwave.net/educational/basictenets/basics3.htm>

“A flat correction differs from a zigzag in that the subwave sequence is 3-3-5, as shown in Figures 14 and 15. Since the first actionary wave, wave A, lacks sufficient downward force to unfold into a full five waves as it does in a zigzag, the B wave reaction seems to inherit this lack of countertrend pressure and, not surprisingly, *terminates near the start of wave A*. Wave C, in turn, generally terminates just slightly beyond the *end of wave A* rather than significantly beyond as in zigzags”.
