November 4, 2017

SATURDAY SERMON

Every important breakout to a new gold bull market high has made a return trip to test that high. The bull move did not resume until that test was complete.

GOLD MONTHLY CHART # 1

Once the first small breakout above the 6 year declining trend line occurred, just about every commodity speculator who bought gold at that breakout knows that a sell stop must be placed just below the bottom of the test low at \$1,204.00. That's the perfect place to put your stops!! This Old Timer, pun intended, says that every last stop placed beneath the \$1,204.00 low must be taken out before the bull market resumes.

GOLD MONTHLY CHART # 2

Once the gold bull market resumes the ultimate high should be at or above the upper trend line of this yearly logarithmic gold chart!!

GOLD YEARLY LOGARITHMIC CHART

So many gold bugs await a stock market collapse and a gold market boom. When, oh when will the stock market finally collapse and gold boom? No technicals, no fundamentals, just as a result of my 61 years of getting pounded by the markets and learning a thing or two, my bet is the S & P 500 will begin to collapse when gold has finished its test of the breakout. When all the sell stops placed beneath the \$1,204.00 low have been taken out, the stock market as represented by the S & P 500 will begin to collapse as gold booms. That's my bet. Just call this old timer ...
