**FEDERAL RESERVE ASLYUM  
WASHINGTON, D.C.**

The green area is called the 75% prediction band. The DJIA and the S & P 500 have been within that green band 75 % of the time since 1913. There are only two occasions when the DJIA moved above the green band. The first time was the peak in 1929. This was Major Wave I. Major Wave II collapsed below the green band. The only other occasion that price went above the green band is the peak of Major Wave III, the peak of leg B of Major Wave III, and now the peak of leg D of Major Wave III. *Above the green band is an extreme overbought area.* That is where Major Wave I and Major Wave III topped. Major Wave II low, minor wave 2 low, and minor wave 4 low did not bottom until they fell below the green band. *Below the green band is an extreme oversold area.* The “Mad Men” of the Federal Reserve and other government officials through the mechanism of their QE’s are desperately trying to keep the stock averages from falling below the green band. Under normal conditions Major Wave IV would not bottom until it fell below the green band. Will the “Mad Men” of Washington D. C. succeed in keeping the stock averages from falling below the green band? I would like to say that there is not a chance in hell that they can accomplish that feat. However, it appears that they can either take us up the path of hyperinflation or, if they chicken out, down to the bottom of the green band but perhaps not below it. Their QE behavior may have the expanding inflationary effect of limiting the extent of the decline of leg E to the bottom of the green band. *Either direction they take, the hour for gold to accelerate dramatically is almost here.*

RON ROSEN - DJIA INDEX - ELLIOTT MAGIC KEY

Dow Jones Industrial Index - 110 Years

**In 1973 when leg D topped and leg E began a 50% drop gold exploded upward and tripled in price.**

**I believe that the current leg D is about to top or has topped.**

If the decline in the S & P 500 is limited to the bottom line of its megaphone pattern the price would be as shown on the S & P 500 chart posted below. That would take prices back to approximately 1995. I believe that was just prior to the “Tech Mania.” The quarterly chart of the DJIA is posted on the next page.
