SPECIAL REPORT

The Running Flat Correction is the rarest form of and most powerfully bullish correction that any item can possibly undergo! Once the correction is complete the item will perform a rare and intensely powerful bull move.

“The forces in the direction of the larger trend are *so powerful* that the pattern becomes skewed in that direction.” E. W. P.

RUNNING FLAT CORRECTION

How can we prove that gold and silver have completed or just about completed the most rare and bullish form of correction? The answer is simple. The Dollar Index is the proof!

RUNNING FLAT CORRECTION

Gold Comex (Comb) Co - D57/00 - MONTHLY Bars 12/16/2015 Close = 1076.800 (15.200) Using '20(20)GOLD' Delta TP's File: C:\Gd\Newfolder\F027.DTA (1)

GOLD MONTHLY

RUNNING FLAT CORRECTION

SILVER MONTHLY

Contrary to just about every known expert in the precious metals, gold and silver began a bull market running flat correction one month before the Dollar Index began a bear market correction. Both corrections appear to be complete.

GOLD MONTHLY

DOLLAR INDEX MONTHLY

Gold and silver began their correction in March 2008 The Dollar Index began its correction in April 2008. It apparently is the \$1,923.70 leg [B] high in gold that confused most gold aficionados.

The Dollar Correction topped when the volume peaked.

SILVER MONTHLY

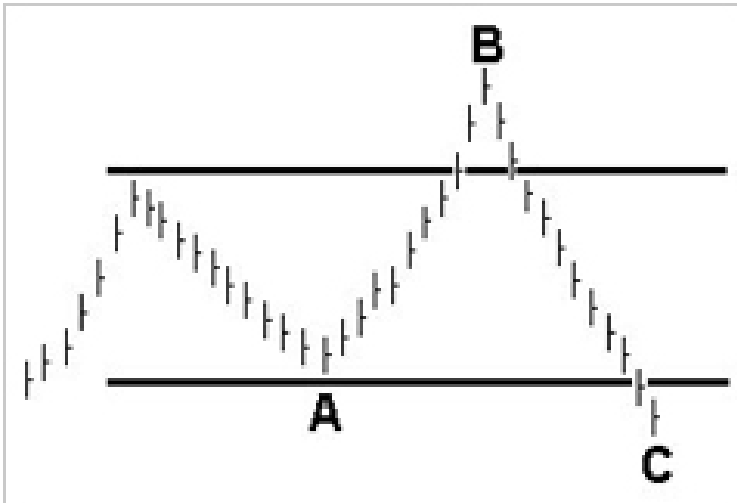

DOLLAR INDEX MONTHLY

The XAU and the HUI began an Irregular Flat Correction the same month and year that gold and silver topped March 2008.

Irregular Flat Correction

In this type of correction, Wave B makes a new high. The final Wave C may drop to the beginning of Wave A or below it.

The Dollar Index bottomed in April 2008 one month after the XAU and the HUI began their correction in March 2008. Obviously gold, silver, the XAU, and the HUI all topped the same month and year, March 2008, and began a bull market correction. It is also obvious that the Dollar Index began a bear market correction one month later in April 2008.

XAU MONTHLY

DOLLAR INDEX MONTHLY

GOLD QUARTERLY LOGARITHMIC

Gold Comex (Comb) Co - D57/00 - QUARTERLY Bars 12/16/2015 Close = 1076.800 (15.200)

Using '20(20)GOLD' Delta TP's File: C:\Gd\Newfolder\F027.DTA (1)

Monetary Policy in 2007 and 2008

“When significant financial stresses first emerged, in August 2007, the FOMC responded quickly, first through liquidity actions--cutting the discount rate and extending term loans to banks--and then, in September, by lowering the target for the federal funds rate by 50 basis points. ¹ As further indications of economic weakness appeared over subsequent months, the Committee reduced its target for the federal funds rate by a cumulative 325 basis points, leaving the target at 2 percent by the spring of 2008.”

.....

Gold began a bull market correction in spring of 2008...March 2008.

The Dollar Index began a bear market correction in spring of 2008...April 2008.

GOLD MONTHLY

DOLLAR INDEX MONTHLY

The Federal Reserve raised interest rates on December 16, 2015 for the first time since November 2008. Based on the irrefutable evidence in this *SPECIAL REPORT* in my opinion the correction in gold, silver, and the XAU is ...
