REPORT

Quantitative Easing - Investopedia

“Quantitative easing is an unconventional monetary policy in which a central bank purchases government securities or other securities from the market in order to lower interest rates *and increase the money supply.*”

QE1 (Dec 2008 - Jun 2010)
QE2 (Nov 2010 - Jun 2011)
QE3 (Sep 2012 - Oct 2014)
QE4 (Jan 2013 - Oct 2014)
The End of QE - Dec 2014

Swing Low, Sweet Chariot

The Devil made me do it!

“...and increase the money supply.”

Quantitative Easing began in the December Quarter of 2008. Starting in December 2008 the correction in gold became a Running Flat Correction. A Running Flat Correction is the most bullish correction known to technical analysis of the markets. It portends a massive, massive move to the upside. The ingredients necessary to create this massive, massive move to the upside are in the cauldron. The fire under the cauldron is huge and the water in the cauldron is boiling. The explosion may be slightly delayed until the C leg down of a small Regular Flat Correction is complete. *However, the C leg down is not guaranteed to take place.* Therefore, knowing that a massive move up in gold bullion will be taking place I suggest we relax and let gold do its “thing.”

“The forces in the direction of the larger trend are so powerful that the pattern becomes skewed in that direction.” E. W. P.

Running Flat Correction

GOLD QUARTERLY

Thanks to Quantitative Easing the Dow Jones Transports and the Dow Jones Utilities began moving up with the Dow Jones Industrials in December 2008.

(last updated 2017-12-22 (Close of previous day debt was \$20,492,946,882,116.34)

Based on 143.8 Trillion dollars of combined debt and unfunded liabilities it appears that the Quarterly gold chart and the Yearly Logarithmic gold chart are telling us that there is no possibility that our government will voluntarily force us into an economic collapse. They voluntarily, in a panic, forced Quantitative Easing upon our economy. If there is a collapse in our economy it will most likely be an involuntary collapse. Therefore, I suggest we follow the Long Term gold charts until they tell us the bull market is complete.
